A draft review is put up for approval

The results of the auction Sales Continue to ~~distillate~~ show (as in the previous year) that in many cases there is no margin of profit at all to the manufacturer. This will probably result in malpractices. The point was noticed in last year's review.

Office of the Excise Commissioner
in Mysore,
Dated Bangalore 18th September 1911.

No. 2410
C-22

From

K. Doraswami Iyer, Esq.,
Offg: Excise Commissioner in Mysore.

To

C. S. Balasundram Iyer, Esq., B.A.,
Offg: Secretary to the Government of
His Highness the Maharaja of Mysore,
General and Revenue Departments.

Sir,

I have the honor to submit my report on the Administration of the Excise Department of the State for the year 1910-11 along with the usual statistical statements.

Chapter I. Introductory.

Personnel of the Department.

2. Mr. H. H. Sparkes continued to hold charge of the Department up to the 22nd April last when he went on leave and I was in charge during the remaining portion of the year.

3. Mr. C. Krishnama Naidu the District Excise Officer of Tumkur having gone on combined leave

in

in September 1910 was succeeded by Mr. G. Hanu-
-mantha Rao, Assistant Commissioner from Shemoga
There were no other changes in the personnel or
charge of the District Excise Officers.

Excise Ranges.

4. The number of Excise Ranges continued to be the same as in the past year, forty-three in charge of Inspectors and the remaining six in charge of Probationary Inspectors. The - - constitution of Mysore City as a separate Range in charge of a full-time officer proved an - - effective check over the actions of dealers in illicit Ganja as a number of cases were reported therefrom. A proposal for 4 more Ranges in charge of Probationary Inspectors is pending before Government.

Important changes.

5. The principal changes in the Excise Adminis-
-tration during the year under report were as follows:-

I. Country Spirits.

(a) The duty on country spirits was raised from Rs.5-15-0 to Rs.6-5-4 per proof gallon while the strength was lowered in the case of ordinary arrack to 25 U.P. and in the case of Sophisti-
-cated liquors to 20 U.P.

(b) The price of molasses arrack issued to

to shop-keepers was raised from R$.0-10-11 to R$.0-13-2 per gallon of 25 U.P. while that of jaggory arrack of the same strength from R$.0/11// to R$.0-14-7 per gallon.

(c) The price of sophisticated liquors was also increased by the Manufacturers.

(d) For purposes of reduction of spirit, Hessarghatta water was used in lieu of the -- Distilled water at the Distillery.

(e) The Arrack carrying contract for the next five years was granted on tender to Messrs V. Thimmia and K. Nettakallappa at reduced -- rates.

(f) The Arrack Manufacturing contract was continued to the successors of Messrs A. Maigonda -deva Mudaliyar and M. Bajjanna the original partners of the firm both of whom died in the course of the year.

2. Foreign Liquors.

(g) Messrs Spencer and Co., were permitte to sell in their Refreshment Rooms in the Pro--vince certain brands weaker than 15 U.P. in strength so long as the guaranteed strength -- covered all obscurations

(h) The draught Foreign beer tavern on th Kolar Gold Fields was sold for a period of six months from 1st January 1911.

3. B e e r.

(i) Rules for the import and transport of country beer were approved and passed.

4 Toddy.

(j) As an experimental measure the toddy shops of some taluks were sold on a two year lease.

(k) To facilitate the speedy marking in Bagani areas the rules framed were enforced during the year.

(l) Tree-tax on toddy yielding trees was enhanced for all shops subject to annual lease with effect from 1st July 1911.

(m) The lessees of long leases were allowe to hold their shops on the terms of the notifica -tion on which they purchased their shops.

(n) To prevent loss of tree-tax by the - - renters paying lower rates supplying toddy clan- -dastinely to those who have to pay the higher rates, certain rules were prescribed with the approval of Government.

5. Intoxicating drugs.

(o) Ganja was grown by Amani at Dodkurgod.

(p) The price of Ganja was raised from - - Rs.1/- to Rs.1-4-0 per seer of 80 tolas.

(q) Sanction was received to raise the duty on Ganja from Rs.5/- to Rs.7-8-0 for a seer of 80 tolas from 1st July 1911. and in conse- -quence the fixed selling price of 2 annas per tola was ordered to be converted into a minimum price.

(r) Sanction was received from the Govern- -ment

Government of India to import Ganja into the State duty free from any of the British Store--houses in the Madras Presidency or in the Central Provinces.

6. Opium.

(s) The fixed selling rate of 9 annas per tola was ordered to be abolished from 1st July 1911 and licensees were permitted to fix their own rate.

7. General

(t) The establishment for the speedy preparation of the Inam refund bills in the Mysore District was continued during the year.

(u) The Patrol Party in the Kolar Gold Fields was also continued with some modifications.

(v) To cope with the heavy Excise work in the Bangalore Taluk office an additional hand on Rs.12/- was sanctioned.

(w) To protect the casks from exposure to sun and rain a verandah was put up to the building occupied by the Bangalore City Bonded Depot.

(x) The Excise Training School was continued during the year.

(y) The Ganja establishment was discontinued after the curing operations about February 1911 when it was utilized to watch the ripe date plantations in the Goribidnur Taluk.

(z)

(z) Rules for the transport of liquors and intoxicating drugs from one portion to another of British territory across Mysore territory - - were prescribed.

The responsibilities of Excise and Revenue officials in the matter of collection of Excise Revenue were defined.

(z^{2}) The Assistant Inspector in charge of the Patrol Party in the Kolar Gold Fields was empowered to perform the duties under sections 40 to 53 of the Excise Regulation.

(z^{3}) The District Excise Officers of the status of Amildars were empowered to compound offences under section 67 of the Excise Regula-tion.

Chapter II. Country Spirits.

Distillery Buildings.

6. The following important improvements were made to the Distillery buildings during the - - year.

(a) The northern side compound wall having come down on account of excessive rains was re--built during the year.

(b) The floor of the old wash-room was - - altered and cemented with new drains.

(c) A new door was opened between the - - preparation room and the new wash-room.

(d) The flooring of the cultivation and the preparation rooms was covered with granite slabs.

(e) The special liquor room in the spirit warehouse was extended and a room for storing in methylated spirit was constructed.

(f) The flooring of the Receiver room was raised to the ground level and the walls and the roof were lifted up in proportion.

(g) Minor improvements such as repairing drains and opening windows were also made during the year.

7. The telephonic connection with the Dis- -tillery and the office has not yet been connect- -ed with the central exchange as the new switch board is said to be still under construction.

Distillery Water-Supply.

8. Pipe water from Hessarghatta is being used for purposes of reducing spirits and Kempambudi tank water for cooling, cleaning and all other purposes.

Coffey Still.

9. For want of additional receiver rooms both the Coffey Stills are not worked simultaneously but one is made to relieve the other for purposes of repairs. Nevertheless adequate stock is maintained.

Visitors.

10. The following State officers visited the Distillery during the year under report:-

1. The Dewan of Mysore.
2. Mr. M. Visvesvaria, Chief Engineer of Mysore.
3. Mr. J. S. Chakravarti, Comptroller of Mysore.
4. Lt. Col. Smyth, Senior Surgeon and Sanitary Commissioner in Mysore.
5. Mr. J. Weir, Inspector General of Education in Mysore.

Attenuation Register.

11. The record of attenuation is maintained and arrangements are being made to gauge the wash backs at the Distillery.

Privilege of Manufacture.

12. The Manufacturing contract of Messrs A. Narainswami Mudaliyar and Co., and M. Bajjanna was continued to the successors of the original partners under the designation of Messrs A. Narainswami Mudaliar and Co., and M. Bajjanna and Sons at the same rates agreed to originally.

Supply to Coorg.

13. The Manufacturing Contractors were, as in the past year, allowed to manufacture in the - - Central Distillery the necessary supply of arrack for Coorg and to export the same free of duty.

Manufacture.

14. The quantity of arrack manufactured amounted to 500483 gallons and 4 drams which added to the opening balance of 10507 gallons and 24 drams on hand at the beginning of the year, gave a total stock of 510990 gallons and 28 drams. Deducting wastage and feints to the extent of 8488 gallons and 14 drams and a quantity of 467 gallons and 19 drams taken for methylation, the net stock was 502034 gallons and 46 drams. Of this -- 487632 gallons and 20 drams were issued from the Distillery leaving a balance of 14402 gallons and 26 drams or 17364 gallons and 14 drams in terms of 25 U.P.

15.

Issues to the Civil and Military Station and Coorg.

15. 83583 gallons and 9 drams of ordinary arrack 59 gallons of rectified spirit, 1803 gallons of Rum and 54 gallons of Methylated Spirits were --- issued to the Civil and Military Station against 77666 gallons and 38 drams, 110 gallons, 3465 gallons and 74 gallons respectively in the pre--vious year. The issues to Coorg amounted to 10934 gallons and 7 drams of Over-proof spirit against 15398 gallons and 23 drams in the pre--vious year.

Issues to the State.

16. The issues from the Central Distillery to the Bonded Depots under bond for issue to licens on prepayment of duty and to Government and - charitable Institutions free of duty amounted to 388505 gallons and 2 drams as detailed hereunder

	Gls.	drs.
Molasses arrack.	382062	- 11
Jaggery arrack.	2567	- 0
Proof-Spirit.	62	- 0
Special Liquors.	3067	- 42
Methylated Spirits.	406	- 0
Rectified Spirit.	340	- 0

Besides a quantity of 3115 gallons and 2 drams of special liquors was issued on prepayment of duty to the licensees in the Bangalore City and the Kolar Gold Fields and to the Manufacturers for samples direct from the Distillery.

Methylated Spirit.

17. 460 gallons of methylated spirit were manufactured and issued from the Distillery against 623 gallons and 26 drams in the previous year. To the Civil and Military Station only 54 gallons were supplied during the year under report while 74 gallons were supplied in the pre--vious year. The issue for local consumption was 406 gallons against 549 gallons and 26 drams showing a decrease of 143 gallons and 26 drams. The enhanced bottling charges and the consequent rise in the retail price must have contributed to this decrease. The number of licenses issued for the sale of this spirit was 26 against 16 of the previous year and the quantity sold was 337 gallons and 42½ drams against 421 gallons and 25½ drams.

Issues free of duty.

18. The details of issues of Rectified and Methy -lated Spirits free of duty to Government and - - charitable Institutions were as follows:-

	Rectified spirit.	Methylated Spirit.
Superintendent, Medical Stores.	290 Gls.	70 Gls.
Medical Officer, Victoria Hospital ...	"	44
Agricultural Chemist ...	20	"
St: Martha's Hospital ..	24	"

State

	Rectified spirit.	Methylated spirit
State Geologist ...	Gls.	8 Gls.
Principal, Central College, Bangalore ...	6	"
	340 Gls.	122 Gls.

The supply of Rectified spirit to the Principal, Central College, free of duty was ordered in - Government Proceedings No. 4734-6/Edn.114-10-4, dated 2nd December 1910.

Adequacy of supply.

19. Though the stock fell short of the minimum quantity prescribed on some occasions no complain of want of supply was received.

Quality of the Spirit.

20. There were no complaints regarding the - - quality of the spirit supplied by the Manufac--turers. The molasses obtained from Java and Goribidnur were principally used for the purpose of distillation.

Transport of arrack.

21. There was no change in the carrying con--tractors during the year. The firm of Messrs A. Narainswamy Mudaliyar and Co., and M.Bajjanna and Sons successors to the deceased original partners, transported a quantity of 388043 gls., and 2 drs., of which 80480 gallons and 45 drams

were

were sent to the Bangalore City Bonded Depot and the balance to the outlying Depots. The remunera-tion payable therefor amounted to Rs.54915-12-7 as detailed in Appendix B. The wastage both bung and stand on the quantity of ordinary arrack transported to the outlying depots was 3374 gls. and 41⅛ drs. or a percentage of .9 against 1.3 of the previous year. The low percentage of wastage clearly indicates that better control was exercised in the Bonded Depots.

22. The location of Bonded Depots in Government buildings is being arranged. Wherever possible additions and alterations are proposed to the Taluk cutcherry buildings. In a few places wher Government buildings are made available for the Depots, the rents charged have brought out loud complaints from the Mutsaddies as being beyond their means. The proposal to levy a uniform rate consistent with the minimum prescribed is pending orders.

Advance to Manufacturers.

23. The particulars of the advance with the ad-justment and the balance are shown in Appendix A. The outstanding balance includes the value

in

in money of the stock of spirits on 1st July 1910 and of the wastage incurred in the several Bonded Depots and also the cost of proof liquor utilised for adjustment at Government cost.

Bonded Depots and issues therefrom.

24. The number of Bonded Depots continued to be the same as in last year. The extra depot at Bowringpet for the supply of jaggory and methy-lated spirits in bottles is being continued for the convenience of the licensees.

25. The quantity of arrack issued from the Bonded Depots for public consumption amounted to 374514 gallons and 28½ drams which gives an incidence of 3.5 drams per head of population. In the cities of Bangalore and Mysore the incidence was 53.03 and 26.0 respectively, while in the Kolar Gold Fields it was 74.5. Comparing with the previous year the incidence has increased in Bangalore and Mysore Cities while it has gone down in the Kolar Gold Fields. The incidence for the whole State has decreased by .1 dram.

Number of shops.

26. The number of arrack shops for the sale of country spirits was 781 or 43 less than in the previous year. The decrease was made in all the

the Districts except Shemoga. In the Kolar District as many as 27 shops were closed but yet no practical inconvenience was reported. Keeping in view the legitimate demand for spirits, the number of shops in the Bangalore and Mysore Dis--tricts were reduced by 9 and 2 respectively. In consultation with the Presidents of the Municipal--ties of Bangalore and Mysore Cities, still - - further reduction of liquor shops in the 2 cities has been arranged from the beginning of the - - current year.

27. The particulars of transactions of all liquor in the several Bonded Depots are noted in Appendix J - I.

Area and population per shop.

28. During the year under report there was one arrack shop for 37.6 square miles and 6978 people The details are noted in Appendix D. The Districts of Bangalore and Shimoga are the heaviest arrack consuming centres and have one arrack shop for 15 and 25 square miles respectively. While in the District of Kolar more important on account of the Gold Fields there was one arrack shop for 23 square miles.

Rentals.

29. The rentals obtained from the sale by auction of the right of vending arrack in the retail shops inclusive of the jatra shops fell from Rs.364133/8 to Rs.334508/5/6 in the year under report. The decrease is distributed over all the Districts -- except Hassan and Kadur where there was a slight increase. Considering the enhancement of duty and the reduction in the strength of the spirit and the increase of the previous year the present result need not arrest attention.

Consumption.

30. The total consumption of arrack fell from 383322 gallons and 28½ drams to 375756 gallons and 20½ drams. The decrease of 7566 gallons and 7 drams is made up of an increase of 1869 gls and 20 drams in the toddy consuming centres of Mysore, Tumkur and Chitaldrug and a decrease of 9435 gallons and 33 drams in the remaining 5 Dis-tricts, thus showing that this liquor must have to some extent supplanted toddy which may not have been relished on account of the heavy rains. The result on the whole shows that, in spite of the reduction in the number of shops, the drinking population of Mysore who had, by long usage, - -

become

become accustomed to the use of 20 U.P. arrack are not so refractory as they were thought to be, but freely adapt themselves to all wholesome -- changes without demur.

31. The District of Kolar records the highest -- fall, viz, 5538 gallons and 17 drams. This can be no matter for surprise when the reduction of as many as 27 shops is considered. Next in order stand Kadur, Bangalore, Shemoga and Hassan which have contributed to s l of 1316, 1213, 967 and 399 gallons respectively. Preference to special liquors and the more stimulating quality of Bagani toddy are pointed out as having brought about the fall by the Deputy Commissioner of Kadur; while the cessation of the visit of consumers from -- Coorg to the frontier shops owing to the assimila--tion of the strength on both sides and the comple--tion of the Krishnaraj anikat are shown to -- account for the fall in the Hassan District. The closure of 9 shops in the Bangalore District must have contributed to the fluctuation noticeable -- there. In the Shemoga District, however, the lambani thandas may have to some extent replaced

licit

-licit arrack by illicit supply as is evident by the number of illicit Distillation cases reported from that District.

Jaggory Arrack.

32. The consumption of sugarcane jaggory arrack rose from 1824 gallons and 21¼ drams to 2462 - - gallons. The District of Kolar shows an increase of 927 gallons. This is due to the proper - - working of the shop exclusively set apart for the sale of this spirit on the Gold Fields. Bangalore and Shemoga record a fall of 58 and 40 gallons respectively while the decrease in the other Dis--tricts is too small to call for remarks.

Special Liquors.

33. The quantity of these liquors sold in the arrack shops specially permitted therefor and in the 16 separate shops licensed exclusively f their sale amounted to 3102 gallons and 46¾ drams Besides a quantity of 2625 gallons was consumed in the Foreign Liquor shops on the Kolar Gold -- Fields, thus making up a total of 5727 gallons and 46¾ drams as against 4231 gallons and 50½ drams in the previous year. The increase has not been as rapid as it was last year although 4 additional shops were opened during the year --

under

under report. This may probably indicate tha the quality of these liquors is still capable of improvement. Arrangements are being made for the issue of well mellowed liquors stored in - - sherry casks.

34. The object of placing these liquors on the market is to minimize the consumption of cheap imported brands of Foreign Liquor which are, according to Major Bedford, "considered more fashionable" impelled by the force of Enropean example. The taste of the middle class of con--sumers to whom these liquors are intended does not appear to have suffered and the adoption of the generic names of Whisky, Brandy, Gin and Rum has stood its ground successfully in the competi--tion. The danger of the encroachment of -- imported brands on the country liquor trade and the consequent interference with the fiscal - - considerations of the State Revenue is being - - gradually averted.

Proof Spirit.

35. For the purpose of adjusting weak liquor in the shops, a quantity of 17 gallons and 44 - - drams was utilized at the expense of the concerned licensees

licensees. But the Government liquors con - -sumed only 95 gallons and 28¼ drams for their adjustment in Bonded Depots as against 104 - - gallons and 47½ drams in the previous year. There is, however, more scope for minimizing the --- expenditure of this spirit, if only the Taluk Revenue officers interest themselves to read the instruments with greater care. Fallacious tests often necessitate the use of this spirit. As, however, the majority of the Excise Staff are now sent out trained, advantage will be taken to issue necessary instructions for the purpose of pr ıethod of testing liquors to these Taluk officers.

Revenue per gallon of Country spirit.

36. The Revenue per gallon of country spirit is exhibited in the following statement:-

District.	Quantity consumed.	Amount of rental.	Incidence of vend rent per gallon. 1909-10	1910-11	Margin of profit.
	Gls. drs.				
Bangalore.	12045 - 12	Rs. 66900/-	Rs. 0-10- 8	0- 8-11	
Kolar.	87052- 0	127839/-	1- 7- 8	1- 7- 6	
Tumkur.	11312 - 0	8559/-	0-15-10	0-12-10	
Mysore.	53292 - 49	29160/-	0-10- 1	0- 8- 9	0-12-10.
Hassan.	16656 - 10½	15735/-	0-14- 4	0-15- 1	
Kadur.	30237 - 0	35409/-	0-15- 7	1- 2- 1	
Shemoga.	47438 - 0	41487/-	0-15- 7	0-13-11	
Chitaldrug.	9316 - 0	8604/-	1- 0- 1	0-14- 9	
Total.	375756 - 20½.	333693/-.	0-15- 2.	0-14- 6.	

The Districts of Bangalore and Mysore have left some margin of profit to the licensees while - - Tumkur none at all. The other Districts show that the auction purchaser has paid far in excess of the profit allowed to him. In the latter case the obvious inference would be that he must have recouped himself by dishonest gains. But that is one way of looking at the matter and - - proposals are being worked out for the formation of special detective parties. The Department is doing its best to check these malpractices. In the opinion of the Government of India, dis - -proportionately large receipts from vend rents would indicate that the still-head duty is ---- capable of further enhancement. The fact of th matter appears to be that the excitement of the auction helped out by the well-meant endeavours of the officers conducting the sales may have - tended to inflate the prices.

hapter III. Foreign Liquors.

Number or shops.

37. The number of shops during the year was 24 against 25, one refreshment room at Chickmagalu being closed. The number of licenses issued during the year amounted to 57 against 50 of t last year. Two occasional licenses were issue in the Mysore District and 14 in the Bangalore District, the total amount realized therefrom being Rs. 200/-.

Consumption.

38. The consumption of Foreign Liquors fell - - from 41401 gallons and 30-7/8 drams to 39489 gls. and 7-1/12 drams. Closer supervision over import of Foreign Liquor consignments is pointed out for the fall in the Kolar District. As was --- stated last year, the increase in the consumptio of the locally made double-distilled liquors may have brought about the decrease in the consump--tion of Foreign Liquors much to the advantage of the State Excise Revenue.

Revenue.

39. Inclusive of the surcharge fees. the license fees amounted to Rs.15166/-, against Rs.13697/- in the previous ye

Chapter IV. Toddy Revenue.

Date Toddy.

Shops. 40. The year under report shows a reduction of 41 date toddy shops in addition to the 52 shops closed in the previous year, the actual number of shops licensed being 2595 against 2636. In the Mysore District as many as 23 shops were closed, while in Tumkur, Kolar and Hassan the reduction was 8, 4 and 3 respectively. Bangalore and Chitaldrug closed two shops each and Shemoga had one shop opened. ...actical inconvenience was brought to notice. The existing shops average one shop for 2100 persons and for 11.3 square miles.

Rentals. 41. The rentals fetched from the sale of date toddy shops amounted to R^{s}.13,47,939-6-11 against R^{s}.13,83,610-6-4 in the previous year, showing a decrease of R^{s}.35,670-11-5. This is no doubt due to the reaction of the increased rentals of 1909-10. It may be pointed out that sales tak place in the months of April and May of each yea when people, who naturally judging the prospects of the coming season in the light of their past experience, find themselves disappointed, become too

too slow to yield to the promises of a change for the better. The decrease is noticeable in all the Districts except Mysore, Kolar and Chitaldrug. Mysore shows the highest increase and Kolar stands next. These two Districts had the advantage of a two year lease in some of their Taluks. The increase in the Chitaldrug District is too small to call for remarks.

Number of trees tapped.

42. The number of trees tapped for local consumption was 5,95,002 date, 4,052 cocoanut against 4,35,618 date and 3,918 cocoanut of the previous year in the State itself, while 15,671 date, 1,331 cocoanut, and 100 palmyra trees were tapped in the British territory against 19,228 date, 500 cocoanut and 80 palmyra trees of the past year. The decrease is noticeable in all the Districts to the extent of 41372 trees under all heads. This may be attributed to the resuscitation of the date tree owing to good rains and the consequent increase in the yield. It would be interesting to compare the fluctuations in the rentals and in the number of trees licensed in the Mysore State to find out the relative

relative effect of each on the other. The marginally noted figures show that Tumkur has kept its ground as regards trees notwithstanding its greatest loss in rentals, while Chitaldrug added a few Rupees under rentals but has far - - receded in the matter of trees. It is only Kolar that shows a most satisfactory result under both heads. What is gained under rentals in Mysore is lost in trees, while the remaining - - Districts show a decrease under both items.

District.	Fluctuation. Rentals	Trees tapped.
Bangalore.	- 14826	- 10564.
Kolar.	+ 3605	+ 752
Tumkur.	- 32792	- 217
Mysore.	+ 14475	- 10346
Hassan.	- 3336	- 3436
Kadur.	- 3030	- 2319
Shemoga.	- 59	- 1045
Chitaldrug.	+ 456	- 11561

Government and Private trees.

43. The total number of trees tapped in Mysore both for local and British shops amounted to - - 428735 of which 265944 were Government trees -- standing on unoccupied lands and the rest on occupied lands. The licensees of the Mysore State tapped during the year under report as - - many as 153381 trees in private lands and the remaining were taken up by the British renters. the following table explains the figures more clearly:-

	Govt.	Private.	Total.
For Mysore shops.	263171	153381	416552
For British shops.	2773	9410	12183
	265944	162791	428735

The amount of tree-rent credited to Excise - - proper was Rs.64970-11-7 against Rs.69207-11-7 in 1909-10. Further details about tree-rent are given in Appendix F-1.

44. The percentage of Government, Private and British to the total number of trees stands as follows:-

	1910-11.	1909-10.
Government.	61.4	61.2
Private.	35.7	34.7
British.	2.9	4.1

The low percentage of trees tapped for British shops may be due to the enhancement of tree-tax in Madras during the year under report. The percentage of private trees has gone up during the year and this indicates that trees in - - occupied lands are becoming more popular on account of their larger yield standing in --- cultivated fields and tree-owners should, therefore have no cause for complaint.

Appendix G - 1.

45. The percentage of tree-tax to the total --- toddy revenue fell again from 30.5 to 29.3, while that of the rental rose from 69.5 to 70.7.

During

During the year under report the system of leas--ing out shops for two years was introduced and this must have affected the rentals to some extent. The fact that the percentage of tree--tax in this State has not gone above 33.6 is a clear indication that the rate of tax prescribed is capable of further enhancement. As, however, this measure has been adopted in the current --- official year the result remains to be watched.

Trees tapped for the Madras Presidency.

46. The number of trees tapped in Mysore for the shops of the Madras Presidency amounted to 11738 date and 445 cocoanut as against 16127 date and 920 cocoanut in the previous year, while the Mysore licensees have taken up 15671 date, 1331 cocoanut and 100 palmyra trees as against 19228 date, 500 cocoanut and 80 palmyra trees in the previous year. The intertapping of trees on either side of the frontier depends more on the inclinations of concerned licensees than to any external causes.

Date Plantation.

47. The Deputy Commissioner, Mysore District, reports that the date plantation opened last --- year near Nagamangala is coming up well and that the

the seedlings and the saplings are healthy and that the plantation is full of hopes. During the year under review a plot of land measuring 29 acres in Settihalli village near Kikkeri in the Krishnarajpet Taluk was acquired for the - - Department and given out to an enterprising Shanbogue to make it a good date plantation on condition that he should fence the whole plot, plough it and dibble new seeds and pay Hulbanni and Amaroyi in return for the concession of cutting and removing the grass growing on the plantation. The date plants in the sand dunes of Talkad in the T. Narsipur Taluk are reported to be a failure. As paucity of date trees is felt in the Nagamangala and Malavalli Taluks every endeavour will be made to open out new plantations in these two Taluks.

48. In the Kolar District, however, the plant-ing operations near Vatathahosahalli in the Goribidnur Taluk are reported to be promising. The Lakkenahalli plantation in the Siddlaghatta Taluk is reported to be in good condition. The Deputy Commissioner desires to open out plan-

-tations

plantations in the Taluks of Mulbagal, Bagepalli and Siddlaghatta. These will be taken up as lands congenial for date growth become available. The date groves in the village of Kellengere in the Arsikere Taluk and Devaramuddan-halli in the Hole-Narsipur Taluk of the Hassan District are recommended for extension by the Deputy Commissioner. The result of the experimental plantation in the Pavagada Taluk of the Tumkur District remains to be watched.

49. To open out plantations in the Shikarpur and Sorab Taluks, two American ploughs were supplied to the Shemoga District. The effect of opening out the soil with these ploughs and consequently on the growth of the date palm is yet to be seen. Want of date groves is keenly felt in these two Taluks and the proposal of getting trees from the Bombay frontier remains yet to be developed. In the meanwhile attention will be directed to open out local sources of supply.

Inamdars' claims to Toddy Revenue.

50. The number of alienated villages in the Province is 2044, of which only 146 have current working toddy shops. The claims of 63 villages have

have been settled, while those of 30 are reported to be under investigation. During the year -- under review 8 cases were decided by Government and there are 31 cases pending for orders. Every effort is made to push on the work of investiga--tion as expeditiously as possible.

51. The amount of refund sanctioned during the year in respect of 37 villages aggregate to - - Rs. ~~4640-14-1~~ 46640-14-1. The District of Mysore deserves special mention in having submitted the largest number of bills during the year. Many bills are lying over pending instructions from Government on the working of Rule 13 of the Inamdars' rules.

Ee comm. letter no. 2434 of 19.9.41.

Bagani Toddy.

Number of shops.

53. The number of Bagani toddy shops was reduced by 21 during the year, the actual number licensed being 698 against 719. Shemoga and Kadur - - closed 10 and 12 shops respectively while Hassan had one shop opened. There is great scope for further reduction in these shops and the subject will engage attention in due course.

Rentals.

54. The rentals of Bagani toddy shops amounted to Rs.39,560-8-0 against Rs.35,037-6-0 in the -- previous

previous year showing an increase of R$.4523-2-0. All the three Districts contributed to this --- result. While Hassan added R$.486-6-0 the con--tribution of Kadur and Shemoga was R$.3675/- and R$.361-12-0 respectively. In spite of the -- reduction in the number of shops the result appears to be satisfactory.

Number of trees tapped.

District.	Fluctuations. Rentals.	Number of trees.
Hassan.	+ 486- 6-0	+ 273/-
Kadur.	+3675- 0-0	- 320/-
Shemoga.	+ 361-12-0	- 421/-

55. The marginally noted figures compare the -- fluctuations in rentals and in the number of trees licensed. In spite of the facilities created for speedy marking of these trees, there has been a fall of 468 trees, the actual number licensed being 15618 against 16086 in the previous year. Converting the fluctuation in trees into money value it is found that Hassan has added R$.546/- by way of tree-tax to the rental, while Shemoga has taken away R$.842/- and has left a deficit of R$.480-4-0 above the rental. After deducting the loss under tree-tax, Kadur has still left a sum of R$.3035/- as an addition to the Bagani Revenue. The affairs in the Shemoga District require to be looked into as no explanation is assigned for this fall. In the Hassan District the simpli--fied

simplified rules for marking are reported to have tended to increase the number of trees. It is believed that the better working of these rules in the other two Districts will produce better effect during the next official year when the renters will have become sufficiently ac-
-quainted with them.

Chapter V. Country Malt Liquors.

(1) B e e r.

Number of taverns.

56. With a view to place the sale of the draught English beer on the same footing as that of the country beer, it was contemplated to auction both the taverns at the same time; but owing to the agreement of the former licensees with their -- suppliers in England running till the 1st January 1911, the sale of the latter was given effect to from 1st August 1910 and that of the former from 1st of January following. The country beer tavern at Robertsonpet was sold on an upset price of Rs.250/- while that at Bowringpet was closed. The duty of 2 annas and one and a half pies per gallon was levied on both country and English beers but in the case of the latter only in lieu of the surcharge fees which were being collected before.

57. During the year under report Bangalore Brewery beer was permitted to be sold at the -- Cubbon Park Fete in December last and also in the Military Canteen as usual on the tenant - - system. The licensees of the Foreign liquor

shops

shops were also allowed only to sell bottled beer.

Consumption.

58. The consumption of beer throughout the State has risen from 4953 gallons to 15959 gls. in the year under review. The increase which appears to call for further enhancement of duty, may probably be due to this liquor getting into popular favour on account of its cheapness. This subject will be considered later on.

(2) AKKIBHOJA.

Number of shops.

59. During the year under report the 35 shops of the Tirthahalli Taluk in the Shemoga District were sold, while all the shops of the Kadur District were closed. The number of shops was, therefore, 35 against 43 in the previous year.

Revenue.

60. The shops of the Shemoga District fetched a rental of Rs.2052 against Rs.2002-8-0 showing an increase of Rs.49-8-0. The increased rentals under Bagani toddy in the Kadur District may be attributed to the closing of all the Akkibhoja shops in that District.

61. While the Deputy Commissioner, Kadur, --

pronounces

pronounces this beverage as a noxious and un-
-wholesome drink, the Deputy Commissioner, Shemog
states that, as it is easily manufactured and is
more intoxicating than toddy or arrack, it is
necessary that its manufacture should be regulat-
-ed in such a manner that while placing no res-
-trictions on its brew for bona fide domestic
consumption, it is not permitted to affect the
Excise Revenue by competing with other drinks.
The subject will, however, receive attention
after a thorough investigation.

Chapter VI. Intoxicating drugs and Opium.

(1) G a n j a .

Supply of Ganja.

62. The stock imported from the British Store--house during the latter part of the previous year supplemented by the crop raised in the -- State was continued to be supplied throughout the year. The stock of Ganja in the Provincial Stores on the 1st July 1910 was 8229 seers and one tola and a quantity of 1720 seers and 64 tolas was added to it in January following. As the Government of India sanctioned the import of the drug, duty free, from any of their Store--houses in the Madras Presidency or in the - - Central Provinces it was thought best to employ a contractor for purchasing and supplying the State and for this purpose tenders were called for. As, however, the rate tendered was ---- abnormally high, arrangements were made to import the drug through the Government agency. Accord--ingly a quantity of 11988 seers and 75 tolas was imported from the Santavasal Store-house in the Madras Presidency at a cost of Rs.12000/-

for

for supplying the licensees during the following official year.

Cultivation of Ganja by Amani.

63. The experimental cultivation undertaken during the year at Dodkurugod and round about Goribidnur was not as successful as it was - - expected to be. On account of the heavy rains during the year under report the plants became water-clogged and an outturn of 1720 seers and 64 tolas only was obtained. The ryots have, how-ever, gained some experience in the raising of this crop and this will, no doubt, help them in future cultivations.

64. Only Khandwa seeds were used to grow the drug during the year under report. Seeing the preference of the consumers for the Daggupad stuff it is thought expedient to make another experiment with seeds obtained from Daggupad and for this purpose arrangements are being made. It is hoped that better results will come out from the experience of the past failures.

Price of Ganja.

65. The price of Ganja was raised from R^{s}.1/- to R^{s}.1/4/0 for a seer of 80 tolas during the year under

under report. With effect from 1st July 1911 the duty on a seer of Ganja was raised from Rs.5/ to Rs.7/8/0 per seer and the retail fixed selling price was consequently converted into a minimum price during the year under report.

Shops.

66. The number of Ganja shops licensed during the year was 242 against 236 in the previous -- year. The increase is due to the opening of 4 additional shops in the Kolar District and one in each of the Districts of Tumkur and Chitaldru The incidence was, therefore, one shop for 121.6 square miles and for 22520 persons against 124.1 square miles and 22995 persons in the previous year.

Rental.

67. The rental realized from the sale of Ganja shops amounted to Rs.26739-4-0 against Rs. a.p. 23648-12-0 thus resulting in an increase of Rs.3155-8-0. Tumkur and Hassan are the only Districts which show a fall. The Deputy Commissioner of the latter explains it to be due to the stoppage of the sale of the drug in weekly markets and no explanation is offered for the former. The

increase

increase in the other Districts is said to be due to keen competition at the sales.

Consumption.

68. The quantity of Ganja retailed during the year amounted to 9345 seers and 38½ tolas against 10559 seers and 40 tolas in the previous year. The decrease is probably due to the not very -- superior quality of the stuff supplied and the fancy taken by consumers to the Daggupad stuff available in the bordering British shops. -- Necessary arrangements are being made for the supply of good Ganja.

(2) M a j u m .

Majum.

69. As usual this preparation of Ganja was sold to the licensees of Ganja shops from the Bonded Depots after levying a duty of Rs.1/1/0 and a -- price of Rs.0/6/6 for a seer of 80 tolas. In consequence of the enhancement of the duty on Ganja with effect from 1st July 1911 the duty on this drug also was enhanced to Rs.1-8-0 per seer. The demand for this drug is limited to the Dis--tricts of Bangalore, Kolar and Shemoga.

Consumption.

70. The quantity of Majum sold during the year

was

was 339 seers and 24 tolas against 436 seers and 40 tolas. The decrease is distributed over all the three Districts and is probably due to the diminished fancy of the consumers of this special preparation.

(3) Cocaine and Novocaine.

71. In the Bangalore City 5 licenses were, as usual, granted to Chemists and Druggists for the possession of Cocaine and one to the Chief Medical Officer, Kolar Gold Fields.

72. Permits for the import of Cocaine for use in the several hospitals in the State were granted to the Inspector of Cattle Diseases and to the Senior Surgeon.

(4) O p i u m .

Supply.

73. The opium required for consumption continued to be obtained from the Madras Store-house through the Residency.

Price.

74. There was no change in the price at which opium was supplied to the licensees nor was there any in the purchase price. The former was, as usual, R$.37-8-0 a seer and the latter R$.11-9-0

as

as in the past year.

Number of shops.

75. The 109 shops of the past year were reduced to 108 due to the closure of one shop in the Mysore District found to be superfluous. The incidence was one shop for 272.4 square miles and for 50461 persons.

Rental.

76. The rental realized by the sale of opium shops was R$.8937-12-0 against R$.8572/- in the previous year showing an increase of R$.365-4-0. The increase is made up of a fall in the Tumkur, Mysore and Chitaldrug Districts and a rise in the remaining Districts. The net increase is attributed to keen competition during the sales.

Consumption.

77. The increase in the consumption of opium is too small to call for remarks, the actual quantity consumed being 1246 seers and 20-1/16 tolas against 1226 seers and 30-3/8 tolas in the previous year. The effect of the abolition of the fixed retail price in the current year on consumption remains to be watched.

License to Medical Practitioners.

78. As usual 5 licenses were granted to Medical practitioners for possession of Morphia and opium

opium and its preparations.

Gain.

79. The decrease under gain on sale proceeds of opium is due to increased transporting -- charges, the actual amount realized being --- Rs.27,200-10-1 against Rs.31,571-13-0 in the pre--vious year, according to the Comptroller's -- figures.

Chapter VII. Measures for the protection of the Revenue.

General results.

80. During the year 1910-11, 2301 cases affecting 2662 persons were reported against 1967 cases affecting 2431 persons in the previous year, and including those pending from the previous year, the total number of cases which came before the officers of the Department amounted to 2624 affecting 3087 persons as against 2257 affecting 2850 persons in the previous year. Appendix M gives a classified statement of the offences reported during the year, according to which 427 cases fell under heinous offences, 1839 under breaches of license conditions and 36 under cutting of date trees and leaves against 496, 1408 and 63 respectively during the preceding year. There has again been a perceptible fall under the last head, while under the second the rise is considerable. The reason for the former is ascribed to the favourable rains during the year and the consequent abundance of fodder for cattle. The recent orders of Government investing the District

District Excise Officers with power to compound offences under section 59 of the Forest Regula-tion to enable them to deal with offences of this class departmentally, will, it is hoped, tend to act as a powerful check against all danger to date trees by readily and promptly bringing the offenders to book and thus conduce to the better preservation of the groves. The large increase in the number of minor offences is due to cases of dead date trees having been brought under breaches of license conditions and to better inspection of groves and shops. The increase is made up of a rise in the Bangalore, Mysore, Hassan and Chitaldrug Districts and a fall in the remaining four Districts. Of the cases under Excise Regulation and the rules - - affecting liquors, 2 cases related to smuggling, 65 to illicit distillation and possession of materials therefor, 139 to illicit tapping and 143 to unlicensed sales, illicit transport, possession without license, dilution and use of false measures. 16 cases of smuggling of in-toxicating drugs and 31 of illegal cultivation

of

of Ganja hemp plants were also among the cases reported during the year. The case of illegal cultivation of poppy plants reported from the Siddlaghatta Taluk of the Kolar District was prosecuted to conviction. The increase in the number of cases of illicit distillation discovered was due to the temporary formation of a separate detective staff in Harihar and Shemoga by the deputation of men from the other Districts. This arrangement could not, however, be continued - - without prejudice to the work in those Districts.

Bangalore District.

81. The number of minor offences has increased by 48.3 per cent. There has also been a rise in the number of cases under illicit tapping and smuggling of Ganja from 2 and 6 to 10 and 10 respectively probably due to the exertions of the special staff detailed exclusively for this pur- -pose.

Kolar District.

82. There has been a fall in this District in the number of offences reported under breaches of license conditions by 30 per cent, while the -- number under heinous offences has slightly - - increased. The recent orders of Government sanctioning

sanctioning the retention of the patrol party on the Gold Fields for a further period of three years will, it is hoped, bring about better results.

Tumkur District.

83. It is satisfactory to note that in spite of the decrease under all heads of crime this District has maintained its place as regards the consumption of arrack and in the number of trees licensed. This is indicative of the policy of prevention taking ahead of detection.

Mysore District.

84. The fall in the number of trees licensed in this District shows that there is more scope for improvement. The number of heinous offences has slightly decreased. Surrounded on all sides by the British frontier, the smuggling of Excise-able goods from and into the State in this District has to be particularly guarded against and proposals are being submitted for the formation of detective parties. The number of cases of possession of intoxicating drugs without license has increased from 2 to 10 in the year under report.

Hassan District.

85. In spite of the fall in consumption the number

number of cases under breaches of license condi--tions has risen. Of the heinous offences, - - those relating to illegal cultivation of hemp plant and to illicit tapping have fallen from 21 and 23 to 8 and 18 respectively in the year under report. The fall in the number of illicit tapping cases is attributed to the vigilant super--vision of the subordinates in the Malnad part of the District and this must have tended to - - increase the number of Bagani trees during the year. The Deputy Commissioner is of opinion that the result would have been more satisfactory if a small preventive establishment had been - - added to the general staff.

Kadur District.

86. The noticeable feature in this District is the detection of 5 cases of illicit distillation in the Tarikere Range and a fall in the number of minor offences by 29.5 per cent. The Deputy Commissioner remarks that a large number of cases of illicit tapping goes undetected and unnoticed on account of the difficulties of detection and the inadequacy of the present establishment.

Shemoga District.

87. There is a marked improvement in the detec--tion

detection of cases of illicit distillation and possession of materials therefor in this Dis--trict during the year under report. Most of these were successfully prosecuted to conviction The constitution of Honnali into a separate -- Range now under contemplation will, it is hoped, be productive of more satisfactory result in putting down illicit distillation said to be prevalent in the Lambani thandas thereabouts. The number of cases of illicit tapping detected during the year has, however, fallen and this may account for the fall in the number of bagani trees licensed.

Chitaldrug District.

88. The number of minor offences has enormously increased in this District owing to cases of -- dead date trees having been brought under breache of license conditions as already observed. Under heinous offences there has been a general fall except that 10 cases of illicit distillation and possession of materials therefor are reported during the year against none in the previous year. The Deputy Commissioner again urges the necessity for the formation of a detective staff

89.

Date leaf cutting.

89. The number of offences relating to the -- cutting of date leaves and trees has again fallen from 63 in the previous year to 36 in the year under report. The Districts of Bangalore, - - Kolar and Kadur reported no cases under this head while Tumkur, Hassan and Chitaldrug showed a decrease. The fall in the Tumkur District is noticeable as it reported only 5 against 24 in the previous year. The reason for the fall in these cases may be attributed to the copious rainfall in the year under report.

Departmental disposal.

90. Appendix M - 1 shows the disposal of cases by the Officers of the Department. It is satis--factory to note that the percentage of disposal rose from 85.9 to 86.5 in the year under report. Bangalore had the heaviest file and Kolar the lightest and the percentage of disposal in these Districts was 89.9 and 89.0 respectively.

Disposal by the Magistracy.

91. The number of cases sent up for trial before the Magistrates was 348. Including the cases pending with them from the previous year, the total number of cases they had to deal was 398.

All

All but 45 were disposed of before the close of the year. Out of 604 persons concerned, 457 were convicted, 67 acquitted and 9 were disposed of otherwise leaving 71 awaiting their trial. The percentage of conviction was, therefore, 75.6.

Opium cases.

92. No cases of opium smuggling were reported during the year.

Rewards.

93. The rewards sanctioned during the year -- amounted to Rs.596/- and a further sum of rupees 151-13-3 was spent on secret service, aggregating to a total expenditure of Rs.747-13-3.

Assault on Officers.

94. No cases of assault on officers were report -ed during the year.

Detective Staff.

95. As incidentally observed above the Deputy Commissioners urge for the employment of special detective parties and the Government have also recognized the necessity for the same. Proposals are, therefore, being worked out and submitted.

Inspection.

96. Appendix O shows the details of inspection and itineration made by the District Excise -- Officers. It will be observed therefrom that the

the District Excise Officer, Bangalore, has inspected the largest number of shops although he was on tour only during 129 days in the year. The District Excise Officer, Kolar, who spent 228 days on tour has not inspected half as much as the former.

97. Mr. Sparkes who continued to be in charge of the Department till the 22nd April 1911 -- toured in all the Districts and inspected the Registers of 20 Range offices, 29 Taluk offices, 11 Sub-Range offices and 25 Bonded Depots with those of the District Excise Offices of Tumkur and Shemoga. The notes of inspection were duly communicated to the officers concerned. He visited the Distillery 12 times and inspected the shops in the Bangalore and the Mysore Cities and casually in other places. After I assumed charge I inspected the Registers of the Mysore Taluk with the Bonded Depot Registers and found there was decided improvement since Mr. Sperkes's last inspection. I also visited the Distillery thrice and the notes of inspection were communi-cated to all concerned.

Chapter VIII. Financial results.

Demand, Collection and Balance of Excise Revenue.

98. The gross demand for the year amounted to R$.45,43,180-0-11 against R$.47,20,040-4-9 and the gross collections to R$.43,73,579-11-6 against R$.46,24,442-9-1 in the previous year, the per-centage of collection being 96.3 against 95.6. Appendices F and F-1 give the figures for each District and Appendix K gives the collection under each head of revenue. The loss in gross demand is partly due to the recovery of arrears as will be seen from the marginally noted figures representing the arrears outstanding at the close of each year and partly to the decrease in the current year's revenue.

	R$. a. p.
1900-01	280972- 7- 0
1901-02	240443-15- 4
1902-03	260683- 1- 7
1903-04	261033-13- 5
1904-05	250379- 0-11
1905-06	233681-10- 1
1906-07	273481- 7- 1
1907-08	245526- 8- 9
1908-09	219357-14- 2
1909-10	186432- 6- 3
1910-11	168297-12-11

Arrears.

99. The total arrears demand including tree-rent at the beginning of the year was R$.187756-10-7, of which R$.26330-11-8 were collected and R$.4514-11-10 were remitted, leaving a balance of R$.156911-3-1 at the close of the year. The percentage of this collection was highest in the Tumkur District where it amounted to 36.8 and lowest in Mysore being only .02.

Current Demand.

100. The total current demand for the year - - amounted to Rs.4355423-6-4 against Rs.4499278-13-1 showing a decrease of Rs.143855-7-7 or 3.3 per cent chiefly under duty, rentals and tree-tax. The demand under the several heads (omitting fractions of a Rupee) is given below : -

Major Heads.	Minor Heads.	1909-10.	1910-11.
Arrack.	Still-head duty.	18,52,860	18,27,104

(41583)

Causes for variation on several heads.

101. The decrease under arrack duty and tree--tax is due to the diminished consumption of arrack and a fall in the number of trees licensed The decrease under rentals has already been -- explained under the corresponding heads. The decrease under gain on sale proceeds of opium may probably be due to increased transporting charges. The increase under miscellaneous is due to the recovery of Rs.2073-13-8 from the -- arrack carrying contractors for excess wastage. The other items do not call for further remarks than what has already been stated under their respective heads.

Proportion of fixed to variable portion of the revenue under country spirits and toddy.

102. 84.9 per cent of the revenue from country spirits was derived from Excise duty and 15.1 per cent from rental against 83.5 per cent under the former and 16.5 under the latter in 1909-10, while the proportion of toddy rentals and tree--tax to the total toddy revenue was 70.7 and -- 29.3 against 69.5 and 30.5 respectively in the previous year. 41.8 percent of the total -- Excise revenue for the year was derived from the sale of the various privileges, while it was --

40.7

40.7 per cent in the last year.

Collections.

103. The total collections under current -- demand amounted to R$.43,42,734-4-0 against --- R$.44,78,785-15-0 in the previous year. The balance outstanding at the end of the year was R$.12,689-2-4 against R$.16,697-1-6 at the end of the previous year. The percentage of collect--ion for the whole State was 99.8 against 99.7. Thus there has been some improvement in this direction in the year under report. The District--war percentage of collection is noted below:-

Mysore. Hassan. Shemoga.	99.9
Chitaldrug.	99.8
Tumkur.	99.7
Bangalore. Kadur.	99.6
Kolar.	99.4

The collection work was as usual satisfactory.

Bangalore District.

1. Doddaballapur.
2. Chennapatna.

Kolar District.

1. Malur.

Tumkur District.

1. Gubbi.
2. Tiptur.
3. Pavagada.

Mysore District.

All the Taluks except Krishnarajpet.

Hassan District.

1. Hassan.

Shemoga District.

1. Sorab.
2. Honnali.
3. Sagar.
4. Nagar.

Chitaldrug District.

1. Chitaldrug.
2. Holalkere.
3. Jagalur.
4. Molkalmuru.

104. The marginally noted 28 Taluks arranged Districtwar show nil balance in respect of the current demand, of which, Pavagada, Nagar and Molkalmuru show the same in respect of the gross

demand

demand also. The Taluks of Mysore, Bowringpet and Bangalore have R.18,116-5-9, R.17,690-1-7 and R$.11,134-3-10 respectively outstanding against them and it is hoped that the Deputy Commis - -sioners will see to their early adjustment.

Net receipts.

105. Excluding out of the gross collections, the local cess on certain items to the extent of R$.2,27,260-1-8 credited to local funds and a further sum of R$.5,672-11-0 credited to other departments on account of tree-rent on toddy trees standing in the lands under their manage- -ment, the net revenue credited to Excise amounted to R$.41,40,646-14-10 against R$.43,06,230-9-4 in 1909-10.

Expenditure.

106. The total expenditure under all heads -- amounted to R$.336297-0-10 against R$.320754-0-5. The increase was principally under remuneration to arrack carrying contractors and under salaries of District Excise Officers. The total cost of the establishment including officers of the Excise Department calculated on the total gross receipts was 5.9 against 5.7 per cent, while the percentage of the total expenditure under all charges - - amounted to 7 . 6 against 7.0 per cent

7.0 per cent of the previous year.

General incidence of taxation.

107. The incidence per head of population on the total Excise gross receipts was Rs.0-13-2.4 against Rs.0-13-2.6 in the previous year.

108. Some of the Deputy Commissioners are again urging the necessity of strengthening their office establishment. But as per orders of Government proposals are called for on the subject of revising the same without additional cost.

Departmental Training.

109. The Excise Training School which was continued ran through two sessions during the year. There was no change in the subjects taught. The following table gives the results achieved in the school in each session :-

Session.	Number in class.	Number passed including failures of the previous session		
		Alcoholometry	Excise Laws.	Criminal Law.
1st Session from 1st August 1910 to 6th November 1910.	20	16	17	13
2nd Session. From 7th November 1910 to 13th February 1911.	33	29	31	24

The effect of training has no doubt improved the department.

department considerably. Mr. Shamanna, Assist-
-ant Commissioner, was in charge of the class
as in last year and instructions were given by
Inspector N. Ranga Rao Naidu, B.A.

110. The officers of the Department have on
the whole acquitted themselves well in the dis-
-charge of their duties.

The office establishment is quite up to the
mark and continues to show the good work comment
-ed upon by Mr. Sparkes in the last report.

I have the honor to be,

Sir,

Your most obedient servant,

Offg: Excise Commissioner.

The Report on the Administration of the Excise Department for the year 1910-11 received with letter No. 2410 dated 19th September 1911 from the Excise Commissioner in Mysore.

- - - - - - - - - - - -

Order thereon No. H 3511-20
SR 52-11-2

Dated Bangalore 29-2-1911

During the year several administrative changes of minor importance were effected, the chief of them being the raising of the duty on Ganja from Rs. 5 to Rs. 7-8-0 per seer, the ~~concession~~ Conversion of the fixed selling price of 2 annas per tola into a minimum price, and the abolition of the fixed selling price of opium. These changes took effect on the 1st July 1911. Rules were issued during the year for regulating the transport of liquors and intoxicating drugs from one portion of ~~the~~ British territory to another through Mysore territory; and orders were passed clearly defining the respective

responsibilities of excise and revenue officials in the matter of the collection of Excise Revenue. The revenue derived by means of tree-tax ~~xx~~ on toddy trees was found to bear too ~~a~~ low a proportion to the total revenue from toddy and it was considered that the ~~revenue~~ income from the former source which is a fixed item as distinguished from the fluctuating item of shop rent was~~,~~ capable of further improvement~~,~~. It was ~~accordingly~~ also ordered that with effect from the commencement of the current official year the rates of tree tax on date-palm, cocoanut and dasal trees should be raised from Rs. 1-4-0, 2-2-0 & 0-8-6 to Rs. 1-8-0, 2-6-0 & 0-12-0 respectively. The rate on Bagani trees which ~~is~~ was Rs. 2/- per tree was not interferred with.

2. ARRACK:- During the year under review the strength of the arrack sold to consumers was reduced from 20° to 25° under proof~~, i.e, 5° weaker than the spirit ever before sold in the State~~. The change does not seem to have materially affected ~~the~~ consumption ~~of liquor~~. As against 383322 gallons of arrack consumed ~~in the State~~ during the year 1909-10, 375756 gallons were consumed

63

during the year under review; ~~and~~ The small difference of 7566 gallons is explained as due to causes other than the weakening of the strength of the liquor, and The Excise Commissioner is of opinion that the drinking classes are getting used to the weaker ~~spirit~~ liquor. ~~The object of the change in policy~~, Viz., the supply of weaker spirit to the drinking classes without at the same time driving them to have recourse to deleterious liquors of illicit manufacture may, therefore, be regarded as attained

3. The decrease of a little over 7500 gallons in ~~the~~ consumption ~~of liquor~~ just referred to ~~above~~ is made up of an ~~actual~~ increase in the Districts of Mysore, Tumkur and Chitaldrug and a decrease in the remaining districts, and may be attributed to the continuance of the policy of reducing the number of liquor shops, the growing popularity of the "special liquores" manufactured at the Central Distillery and ~~an increase in the consumption of~~ a preference to Bagani toddy in portions of the malnad ~~districts~~.

4. TODDY:- The total number of trees tapped ~~again~~ showed a decrease to the extent of

41372 as compared with the preceding year. The explanation offered by the Excise Commissioner that this might be due to the recovery of the trees owing to good rains and the consequent increase in the yield of toddy cannot be regarded as altogether adequate. A similar explanation was offered for the decrease in the preceding year. The decrease in some districts in Mysore for example, ~~Mysore~~, as compared with the increase in the shop rent fetched at the sales seems to be abnormal; and the prevalance of illicit tapping on an Extended ~~a large~~ scale may ~~perhaps reasonably~~ be suspected. Similarly, in the malnad districts of Shimoga and Kadur, an increase in shop rent goes with a fall in the number of Bagani trees tapped by the Licensees. This is a matter which requires the careful attention of the Excise Commissioner.

5. BEER:- The consumption of ~~the~~ beer ~~throughout the State during the year~~ was nearly thrice as much as it was in the previous year. The increase has not been satisfactorily explained.

6. GANJA:- The State continued to receive its supply of Ganja mainly from the Depots

in

in the Madras Presidency, the cultivation of Ganja by direct Agency having proved a failure, The Government of India have kindly allowed the import of the drug into the State duty free ~~from~~ from the Store houses in the Central Provinces and the Madras Presidency. The question whether under ~~altered~~ improved conditions Ganja cannot be successfully cultivated in the State is under the consideration of the Excise Commissioner.

Government regret ~~to note~~ that smuggling of ~~the drug~~ Ganja from across the British Frontier continued during the year. As long as the quality of the stuff sold in the State is inferior to that sold across the border, it will be difficult to prevent altogether the temptation to smuggle ~~altogether~~. The Excise Commissioner is requested to expedite ~~his~~ the promised experimental cultivation with seeds of the Duggapad variety which seems to find favour with the consumers.

7. FINANCIAL RESULTS:- The total excise revenue ~~credited into the State accounts~~ was Rs. 43,73,580 against Rs. 45,15,445, the percentage of collection being 96.3 against 95.6

The total current demand for the year amounted to Rs. 43,55,423 against Rs. 44,99,279, showing a decrease of Rs. 1,43,856. The fall in consumption of arrack and in the number of toddy trees tapped account partly for the decrease The shop rent fetched at the auctions under the two main heads of arrack and date toddy also showed a decrease due ~~probably~~ it may be, as surmised by the Excise Commissioner, to the reaction following on the exceptional conditions that prevailed in the year of the drought, Viz., 1908-09. The result ~~is also probably~~ may also be attributed traceable in part to the continued reduction in the total number of arrack and toddy shops in the State.

8. **OFFENCES**:- The report discloses a large increase in the number of cases of illicit distillation and other allied offences detected during the year. It is believed that such malpractices are resorted to largely by Lambanis living in inaccessible parts in the Shimoga and Kadur Districts. Government have under consideration ~~requested the Excise Commissioner to submit~~ proposals for the organization of a special detective staff for the prevention and detection of

67

such offences.]

REPORT

ON THE

ADMINISTRATION

OF

EXCISE REVENUE

IN THE

MYSORE STATE

DURING THE YEAR 1910-11

WITH THE GOVERNMENT REVIEW THEREON

BANGALORE:
PRINTED AT THE GOVERNMENT PRESS
1912

Proceedings of the Government of His Highness the Maharaja of Mysore,

READ—

The Report on the Administration of the Excise Department for the year 1910-11, received with letter No. 2410, dated 19th September 1911, from the Excise Commissioner in Mysore.

No. FL. 3511-20—S. R. 52-11-2, DATED BANGALORE, 29TH FEBRUARY 1912.

ORDER THEREON.—During the year, several administrative changes of minor importance were effected, the chief of them being the raising of the duty on ganja from Rs. 5-0-0 to Rs. 7-8-0 per seer, the conversion of the fixed selling price of 2 annas per *tola* into a minimum price and the abolition of the fixed selling price of opium. These changes took effect on the 1st July 1911. Rules were issued during the year for regulating the transport of liquor and intoxicating drugs from one portion of British territory to another through Mysore territory; and orders were passed clearly defining the respective responsibilities of Excise and Revenue officials in the matter of the collection of Excise revenue. It was also ordered that, with effect from the commencement of the current official year the rates of tree tax on date-palm, cocoanut and *dadasal* trees should be raised from Rs. 1-4-0, 2-0-0 and 0-8-6 to Rs. 1-8-0, 2-6-0 and 0-12-0 respectively. The rate on bagani trees, which was Rs. 2 per tree, was not interfered with.

2. *Arrack.*—During the year under review, the strength of the arrack sold to consumers was reduced from 20° to 25° under-proof. The change does not seem to have materially affected consumption. As against 383,322 gallons of arrack consumed during the year 1909-10, 375,756 gallons were consumed during the year under review. The small difference of 7,566 gallons is explained as due to causes other than the weakening of the strength of the liquor, and the Excise Commissioner is of opinion that the drinking classes are getting used to the weaker liquor.

3. The decrease of a little over 7,500 gallons in consumption just referred to is made up of an increase in the Districts of Mysore, Tumkur and Chitaldrug and a decrease in the remaining districts, and may be attributed to the continuance of the policy of reducing the number of liquor shops, the growing popularity of the "special liquors" manufactured at the Central Distillery and a preference to bagani toddy in portions of the malnad.

4. *Toddy.*—The total number of trees tapped showed a decrease to the extent of 41,372 as compared with the preceding year. The explanation offered by the Excise Commissioner, that this might be due to the recovery of the trees owing to good rains and the consequent increase in the yield of toddy, cannot be regarded as altogether adequate. A similar explanation was offered for the decrease in the preceding year. The decrease in some districts, in Mysore for example, as compared with the *increase* in the shop rent fetched at the sales seems to be abnormal; and the prevalence of illicit tapping on an extended scale may be suspected. Similarly, in the malnad Districts of Shimoga and Kadur, an increase in shop rent goes with a fall in the number of bagani trees tapped by the licensees. This is a matter which requires the careful attention of the Excise Commissioner.

5. *Beer.*—The consumption of beer was nearly thrice as much as it was in the previous year. The increase has not been satisfactorily explained.

6. *Ganja.*—The State continued to receive its supply of ganja mainly from the Depots in the Madras Presidency, the cultivation of ganja by direct agency having proved a failure. The Government of India have kindly allowed the import of the drug into the State duty-free from the Store-houses in the Central Provinces and the Madras Presidency. The question whether under improved conditions ganja cannot be successfully cultivated in the State is under the consideration of the Excise Commissioner.

Government regret that smuggling of ganja from across the British Frontier continued during the year. As long as the quality of the stuff sold in the State is

inferior to that sold across the border, it will be difficult to prevent altogether the temptation to smuggle. The Excise Commissioner is requested to expedite the promised experimental cultivation with seed of the Duggapad variety, which seems to find favour with the consumers.

7. *Financial results.*—The total Excise revenue was Rs. 43,73,580 against Rs. 45,15,445 the percentage of collection being 96·3 against 95·6. The total current demand for the year amounted to Rs. 43,55,423 against Rs. 44,99,279 showing a decrease of Rs. 1,43,856. The fall in consumption of arrack and in the number of toddy trees tapped account partly for the decrease. The shop rent fetched at the auctions under the two main heads of arrack and date toddy also showed a decrease due, it may be, as surmised by the Excise Commissioner, to the reaction following on the exceptional conditions that prevailed in the year of the drought, *viz.*, 1908-09. The result may also be attributed in part to the continued reduction in the total number of arrack and toddy shops in the State.

8. *Offences.*—The report discloses a large increase in the number of cases of illicit distillation and other allied offences detected during the year. It is believed that such malpractices are resorted to largely by Lambanis living in inaccessible parts in the Shimoga and Kadur Districts. Government have under consideration the proposals of the Excise Commissioner for the organisation of a special detective staff for the prevention and detection of such offences.

Exd.—C. V.

No. 2410. OFFICE OF THE EXCISE COMMISSIONER IN MYSORE
Dated Bangalore, 18th September 1911.

FROM,

K. DORASWAMI IYER, ESQ.,
Offg. Excise Commissioner in Mysore.

To

C. S. BALASUNDARAM IYER, ESQ., B.A.,
Offg. Secretary to the Government of His Highness the Maharaja of Mysore, General and Revenue Departments.

SIR,

I have the honor to submit my report on the Administration of the Excise Department of the State for the year 1910-11 along with the usual statistical statements.

CHAPTER I.—INTRODUCTORY.

2. *Personnel of the Department.*—Mr. H. H. Sparkes continued to hold charge of the Department up to the 22nd April last when he went on leave and I was in charge during the remaining portion of the year.

3. Mr. C. Krishnama Naidu, the District Excise Officer of Tumkur, having gone on combined leave in September 1910, was succeeded by Mr. G. Hanumantha Rao, Assistant Commissioner, from Shimoga. There were no other changes in the personnel or charge of the District Excise Officers.

4. *Excise Ranges.*—The number of Excise Ranges continued to be the same as in the past year, forty-three in charge of Inspectors and the remaining six in charge of Probationary Inspectors. The constitution of Mysore City as a separate Range in charge of a full-time officer proved an effective check over the actions of dealers in illicit ganja, as a number of cases were reported therefrom. A proposal for four more Ranges in charge of Probationary Inspectors is pending before Government.

5. *Important changes.*—The principal changes in the Excise Administration during the year under report were as follows:—

(1) COUNTRY SPIRITS.

(*a*) The duty on country spirits was raised from Rs. 5-15-0 to Rs. 6-5-4 per proof gallon, while the strength was lowered in the case of ordinary arrack to 25° U.P. and in the case of sophisticated liquors to 20° U.P.

(*b*) The price of molasses arrack issued to shop-keepers was raised from Re. 0-10-11 to Rs. 0-13-2 per gallon of 25° U.P. while that of jaggory arrack of the same strength from Re 0-11-11 to Re. 0-14-7 per gallon.

(*c*) The price of sophisticated liquors was also increased by the manufacturers.

(*d*) For purposes of reduction of spirit, Hessarghatta water was used in lieu of the distilled water at the Distillery.

(*e*) The arrack carrying contract for the next five years was granted on tender to Messrs. V. Thimmiah and K. Nettakallappa at reduced rates.

(*f*) The arrack manufacturing contract was continued to the successors of Messrs. A. Maigondadeva Mudaliar and M. Bajjanna, the original partners of the firm, both of whom died in the course of the year.

(2) FOREIGN LIQUORS.

(*g*) Messrs. Spencer & Co. were permitted to sell in their Refreshment Rooms in the Province certain brands weaker than 15 U.P. in strength so long as the guaranteed strength covered all obscurations.

(*h*) The draught foreign beer tavern on the Kolar Gold fields was sold for a period of six months from 1st January 1911.

(3) BEER.

(*i*) Rules for the import and transport of country beer were approved and passed.

(4) TODDY.

(*j*) As an experimental measure, the toddy shops of some taluks were sold on a two-year lease.

(*k*) To facilitate the speedy marking in bagani areas the rules framed were enforced during the year.

(*l*) Tree-tax on toddy-yielding trees was enhanced for all shops subject to annual lease with effect from 1st July 1911.

(*m*) The lessees of long leases were allowed to hold their shops on the terms of the notification on which they purchased their shops.

(*n*) To prevent loss of tree-tax by the renters paying lower rates supplying toddy clandastinely to those who have to pay the higher rates, certain rules were prescribed with the approval of Government.

(5) INTOXICATING DRUGS.

(*o*) Ganja was grown by Amani at Dodkurgod.

(*p*) The price of ganja was raised from Re. 1 to Rs. 1-4-0 per seer of 80 tolas.

(*q*) Sanction was received to raise the duty on ganja from Rs. 5 to Rs. 7-8-0 for a seer of 80 tolas from 1st July 1911, and in consequence the fixed selling price of two annas per tola was ordered to be converted into a minimum price.

(*r*) Sanction was received from the Government of India to import ganja into the State duty-free from any of the British store-houses in the Madras Presidency or in the Central Provinces.

(6) OPIUM.

(*s*) The fixed selling rate of nine annas per tola was ordered to be abolished from 1st July 1911 and licensees were permitted to fix their own rate.

(7) GENERAL.

(*t*) The establishment for the speedy preparation of the Inam refund bills in the Mysore District was continued during the year.

(*u*) The patrol party in the Kolar Gold Fields was also continued with some modifications.

(*v*) To cope with the heavy Excise work in the Bangalore Taluk Office, an additional hand on Rs. 12 was sanctioned.

(*w*) To protect the casks from exposure to sun and rain, a verandah was put up to the building occupied by the Bangalore City Bonded Depot.

(*x*) The Excise Training School was continued during the year.

(*y*) The ganja establishment was discontinued after the ~~touring~~ curing operations about February 1911, when it was utilized to watch the date plantations in the Goribidnur Taluk.

(*z*) Rules for the transport of liquors and intoxicating drugs from one portion to another of British territory across Mysore territory, were prescribed.

(*z*) (1) The responsibilities of Excise and Revenue officials in the matter of collection of Excise Revenue were defined.

(*z*) (2) The Assistant Inspector in charge of the patrol party in the Kolar Gold Fields was empowered to perform the duties under Sections 40 to 53 of the Excise Regulation.

(*z*) (3) The District Excise Officers of the status of Amildars were empowered to compound offences under Section 67 of the Excise Regulation.

CHAPTER II.—Country Spirits.

6. *Distillery buildings.*—The following important improvements were made to the Distillery buildings during the year :—

(*a*) The northern side compound wall having come down on account of excessive rains, was rebuilt during the year.

(*b*) The floor of the old wash-room was altered and cemented with new drains.

(*c*) A new door was opened between the preparation room and the new wash-room.

(*d*) The flooring of the cultivation and the preparation rooms was covered with granite slabs.

(*e*) The special liquor room in the spirit warehouse was extended and a room for storing in methylated spirit was constructed.

(*f*) The flooring of the Receiver room was raised to the ground level and the walls and the roof were lifted up in proportion.

(*g*) Minor improvements such as repairing drains and opening windows were also made during the year.

7. The telephonic connection with the Distillery and the office has not yet been connected with the central exchange as the new switch board is said to be still under construction.

8. *Distillery water-supply.*—Pipe water from Hessarghatta is being used for purposes of reducing spirits and Kempambudi tank water for cooling, cleaning and all other purposes.

9. *Coffey Still.*—For want of additional receiver rooms both the Coffey Stills are not worked simultaneously but one is made to relieve the other for purposes of rapairs. Nevertheless adequate stock is maintained.

10. *Visitors.*—The following State officers visited the Distillery during the year under report :—

1. Dewan of Mysore.
2. Mr. M. Visvesvaraya, Chief Engineer of Mysore.
3. ,, J. S. Chakravarti, Comptroller of Mysore.
4. Lt. Col. Smyth, Senior Surgeon and Sanitary Commissioner in Mysore.
5. Mr. J. Weir, Inspector-General of Education in Mysore.

11. *Attenuation register.*—The record of attenuation is maintained and arrangements are being made to gauge the wash backs at the Distillery.

12. *Privilege of manufacture.*—The manufacturing contract of Messrs. A. Narainswami Mudaliar & Co. and M. Bajjanna was continued to the successors of the original partners under the designation of Messrs. A. Narainswami Mudaliar & Co. and M. Bajjanna & Sons at the same rates agreed to originally.

13. *Supply to Coorg.*—The manufacturing contractors were, as in the past year, allowed to manufacture in the Central Distillery the necessary supply of arrack for Coorg and to export the same free of duty.

14. *Manufacture.*—The quantity of arrack manufactured amounted to 500,483 gallons and 4 drams which added to the opening balance of 10,507 gallons and 24 drams on hand at the beginning of the year, gave a total stock of 510,990 gallons and 28 drams. Deducting wastage and feints to the extent of 8,488 gallons and 14 drams and a quantity of 467 gallons and 19 drams taken for methylation, the net stock was 502,034 gallons and 46 drams. Of this 487,652 gallons and 20 drams were issued from the distillery, leaving a balance of 14,402 gallons and 26 drams or 17,364 gallons and 14 drams in terms of 25° U.P.

15. *Issues to the Civil and Military Station and Coorg.*—Eighty-three thousand five hundred and eighty-three gallons and 9 drams of ordinary arrack, 59 gallons of rectified spirit, 1,803 gallons of rum and 54 gallons of methylated spirits were issued to the Civil and Military Station against 77,666 gallons and 38 drams, 110 gallons, 3,465 gallons and 74 gallons, respectively, in the previous year. The issues to Coorg amounted to 10,934 gallons and 7 drams of over-proof spirit against 13,398 gallons and 23 drams in the previous year.

16. *Issues to the State.*—The issues from the Central Distillery to the Bonded Depots under bond for issue to licensees on prepayment of duty and to Government

and charitable institutions free of duty, amounted to 388,505 gallons and 2 drams, as detailed hereunder :—

	Gls.	drs.
Molasses arrack	3,88062	11
Jaggory arrack	2,567	0
Proof-spirit	62	0
Special liquors	3,087	42
Methylated spirits	406	0
Rectified spirit	340	0

Besides, a quantity of 3,115 gallons and 2 drams of special liquors was issued on prepayment of duty to the licensees in the Bangalore City and the Kolar Gold Fields and to the manufacturers for samples direct from the Distillery.

17. *Methylated spirit.*—Four hundred and sixty gallons of methylated spirit were manufactured and issued from the Distillery against 623 gallons and 26 drams in the previous year. To the Civil and Military Station only 54 gallons were supplied during the year under report, while 74 gallons were supplied in the previous year. The issue for local consumption was 406 gallons against 549 gallons and 6 drams, showing a decrease of 143 gallons and 26 drams. The enhanced bottling charges and the consequent rise in the retail price must have contributed to this decrease. The number of licenses issued for the sale of this spirit was 26 against 16 of the previous year and the quantity sold was 337 gallons and 42½ drams against 421 gallons and 25½ drams.

18. *Issues free of duty.*—The details of issues of rectified and methylated spirits free of duty to Government and charitable institutions were as follows :—

	Rectified spirit Gls.	Methylated spirit Gls.
Superintendent, Medical Stores ...	290	70
Medical Officer, Victoria Hospital ...	...	44
Agricultural Chemist	20	...
St. Martha's Hospital	24	...
State Geologist	...	8
Principal, Central College, Bangalore ...	6	...
Total	540	122

The supply of rectified spirit to the Principal, Central College, free of duty, was ordered in Government Proceedings No. 4734-6—Edn. 114-10-4, dated 2nd December 1910.

19. *Adequacy of supply.*—Though the stock fell short of the minimum quantity prescribed on some occasions, no complaint of want of supply was received.

20. *Quality of the spirit.*—There were no complaints regarding the quality of the spirit supplied by the manufacturers. The molasses obtained from Java and Goribidnur were principally used for the purpose of distillation.

21. *Transport of arrack.*—There was no change in the carrying contractors during the year. The firm of Messrs. A. Narainswami Mudaliar & Co. and M. Bajjanna & Sons, successors to the deceased original partners, transported a quantity of 388,043 gallons and 2 drams, of which 80,480 gallons and 43 drams were sent to the Bangalore City Bonded Depot and the balance to the outlying depots. The remuneration payable therefor amounted to Rs. 54,915-12-7 as detailed in Appendix B. The wastage both bung and stand on the quantity of ordinary arrack transported to the outlying depots was 3,374 gallons and 41½ drams or a percentage of ·9 against 1·3 of the previous year. The low percentage of wastage clearly indicates that better control was exercised in the Bonded Depots.

22. The location of Bonded Depots in Government buildings is being arranged. Wherever possible additions and alterations are proposed to the Taluk Cutcherry buildings. In a few places where Government buildings are made available for the depots, the rents charged have brought out loud complaints from the mutsaddis as being beyond their means. The proposal to levy a uniform rate consistent with the minimum prescribed is pending orders.

23. *Advance to manufacturers.*—The particulars of the advance with the adjustment and the balance are shown in Appendix A. The outstanding balance includes the value in money of the stock of spirits on 1st July 1910 and of the wastage incurred in the several Bonded Depots and also the cost of proof liquor utilized for adjustment at Government cost.

24. *Bonded Depots and issues therefrom.*—The number of Bonded Depots continued to be the same as in last year. The extra depot at Bowringpet for the supply of jaggory and methylated spirits in bottles is being continued for the convenience of the licensees.

25. The quantity of arrack issued from the Bonded Depots for public consumption amounted to 374,514 gallons and 28½ drams, which gives an incidence of 3·5 drams per head of population. In the Cities of Bangalore and Mysore the incidence was 53·03 and 26·0, respectively, while in the Kolar Gold Fields it was 74·5. Comparing with the previous year, the incidence has increased in Bangalore and Mysore Cities while it has gone down in the Kolar Gold Fields. The incidence for the whole State has decreased by ·1 dram.

26. *Number of shops.*—The number of arrack shops for the sale of country spirits was 781 or 43 less than in the previous year. The decrease was made in all the districts except Shimoga. In the Kolar District as many as 27 shops were closed but yet no practical inconvenience was reported. Keeping in view the legitimate demand for spirits, the number of shops in the Bangalore and Mysore Districts were reduced by 9 and 2 respectively. In consultation with the Presidents of the Municipalities of Bangalore and Mysore Cities, still further reduction of liquor shops in the two cities has been arranged from the beginning of the current year.

27. The particulars of transactions of all liquors in the several Bonded Depots are noted in Appendix J-1.

28. *Area and population per shop.*—During the year under report there was one arrack shop for 37·6 square miles and 6,978 people. The details are noted in Appendix D. The Districts of Bangalore and Shimoga are the heaviest arrack consuming centres and have one arrack shop for 15 and 25 square miles respectively, while in the District of Kolar, more important on account of the Gold Fields, there was one arrack shop for 23 square miles.

29. *Rentals.*—The rentals obtained from the sale by auction of the right of vending arrack in the retail shops, inclusive of the jatra shops, fell from Rs. 3,64,133-8-0 to Rs. 3,34,508-5-6 in the year under report. The decrease is distributed over all the districts, except Hassan and Kadur, where there was a slight increase. Considering the enhancement of duty and the reduction in the strength of the spirit and the increase of the previous year, the present result need not arrest attention.

30. *Consumption.*—The total consumption of arrack fell from 385,322 gallons and 28½ drams to 375,756 gallons and 20½ drams. The decrease of 7,566 gallons and 7 drams is made up of an increase of 1,869 gallons and 26 drams in the toddy consuming centres of Mysore, Tumkur and Chitaldrug and a decrease of 9,435 gallons and 33 drams in the remaining five districts, thus showing that this liquor must have to some extent supplanted toddy, which may not have been relished on account of the heavy rains. The result, on the whole, shows that, in spite of the reduction in the number of shops, the drinking population of Mysore who had, by long usage, become accustomed to the use of 20 U. P arrack are not so refractory as they were thought to be, but freely adapt themselves to all wholesome changes without demur.

31. The district of Kolar records the highest fall, *viz.*, 5,538 gallons and 17 drams. This can be no matter for surprise when the reduction of as many as 27 shops is considered. Next in order stand Kadur, Bangalore, Shimoga and Hassan which have contributed to a fall of 1,316, 1,213, 967 and 399 gallons, respectively. Preference to special liquors and the more stimulating quality of Bagani toddy are pointed out as having brought about the fall by the Deputy Commissioner of Kadur; while the cessation of the visit of consumers from Coorg to the frontier shops owing to the assimilation of the strength on both sides and the completion of the Krishnaraj anikat are shown to account for the fall in the Hassan District. The closure of 9 shops in the Bangalore District must have contributed to the fluctuation noticeable there. In the Shimoga District, however, the Lambani thandas may have to some extent replaced licit arrack by illicit supply, as is evident by the number of illicit distillation cases reported from that district.

32. *Jaggory Arrack.*—The consumption of sugarcane jaggory arrack rose from 1,824 gallons and 21¼ drams to 2,462 gallons. The district of Kolar shows an

increase of 927 gallons. This is due to the proper working of the shop exclusively set apart for the sale of this spirit on the Kolar Gold Fields. Bangalore and Shimoga record a fall of 58 and 40 gallons respec ively while the decrease in the other districts is too small to call for remarks.

33. *Special liquor.*—The quantity of these liquors sold in the arrack shops specially permitted therefor and in the 16 separate shops licensed exclusively for their sale, amounted to 3,102 gallons and 46¾ drams. Besides, a quantity of 2,625 gallons was consumed in the foreign liquor shops on the Kolar Gold Fields, thus making up a total of 5,727 gallons and 46¾ drams as against 4,231 gallons and 50½ drams in the previous year. The increase has not been as rapid as it was last year, although 4 additional shops were opened during the year under report. This may probably indicate that the quality of these liquors is still capable of improvement. Arrangements are being made for the issue of well-mellowed liquors stored in sherry casks.

34. The object of placing these liquors on the market is to minimize the consumption of cheap imported brands of foreign liquor which are, according to Major Bedford, "considered more fashionable" impelled by the force of European example. The taste of the middle class of consumers to whom these liquors are intended does not appear to have suffered and the adoption of the generic names of Whisky, Brandy, Gin and Rum has stood its ground successfully in the competition. The danger of the encroachment of imported brands on the country liquor trade and the consequent interference with the fiscal considerations of the State Revenue is being gradually averted.

35. *Proof spirit.*—For the purpose of adjusting weak liquor in the shops, a quantity of 17 gallons and 44 drams was utilized at the expense of the concerned licensees. But the Government liquors consumed only 95 gallons and 28¼ drams for their adjustment in Bonded Depots as against 104 gallons and 47½ drams in the previous year. There is, however, more scope for minimizing the expenditure of this spirit, if only the Taluk Revenue officers interest themselves to read the instruments with greater care. Fallacious tests often necessitate the use of this spirit. As, however, the majority of the Excise Staff are now sent out trained, advantage will be taken to issue necessary instructions for the purpose of practically demonstrating the method of testing liquors to these Taluk officers.

36. *Revenue per gallon of country spirit.*—The Revenue per gallon of country spirit is exhibited in the following statement :—

District	Quantity consumed		Amount of rental	Incidence of vend rent per gallon						Margin of profit		
				1909-10			1910-11					
	Gls.	drs.	Rs.	Rs.	a.	p	Rs.	a.	p.			
Bangalore	12,045	12	66,900	0	10	8	0	8	11			
Kolar	87,052	0	1,27,839	1	7	8	1	7	6			
Tumkur	11,312	0	8,559	0	15	10	0	12	10	Rs.	a.	p.
Mysore	53,292	49	29,160	0	10	1	0	8	9			
Hassan	16,656	10½	15,735	0	14	4	0	15	1	0	12	10
Kadur	30,237	0	35,409	0	15	7	1	2	1			
Shimoga	47,438	0	41,487	0	15	7	0	13	11			
Chitaldrug	9,316	0	8,604	1	0	1	0	14	9			
Total ...	3,75,756	20½	3,53,693	0	15	2	0	14	6			

The Districts of Bangalore and Mysore have left some margin of profit to the licensees, while Tumkur none at all. The other districts show that the auction purchaser has paid far in excess of the profit allowed to him. In the latter case the obvious inference would be that he must have recouped himself by dishonest gains. But that is one way of looking at the matter, and proposals are being worked out for the formation of special detective parties. The Department is doing its best to check these malpractices. In the opinion of the Government of India, disproportionately large receipts from vend rents would indicate that the still-head duty is

capable of further enhancement. The fact of the matter appears to be that the excitement of the auction helped out by the well-meant endeavours of the officers conducting the sales may have tended to inflate the prices.

CHAPTER III.—Foreign Liquors.

37. *Number of shops.*—The number of shops during the year was 24 against 25, one refreshment room at Chikmagalur being closed. The number of licenses issued during the year amounted to 57 against 59 of the last year. Two occasional licenses were issued in the Mysore District and 14 in the Bangalore District, the total amount realized therefrom being Rs. 200.

38. *Consumption.*—The consumption of foreign liquors fell from 41,401 gallons and $30\frac{7}{8}$ drams to 39,489 gallons and $7\frac{1}{1\frac{1}{2}}$ drams. Closer supervision over imports of foreign liquor consignments is pointed out for the fall in the Kolar District. As was stated last year, the increase in the consumption of the locally made double-distilled liquors may have brought about the decrease in the consumption of foreign liquors much to the advantage of the State Excise Revenue.

39. *Revenue.*—Inclusive of the surcharge fees, the license fees amounted to Rs. 15,166 against Rs. 13,697 in the previous year.

CHAPTER IV.—Toddy Revenue.

Date Toddy.

40. *Shops.*—The year under report shows a reduction of 41 date toddy shops in addition to the 52 shops closed in the previous year, the actual number of shops licensed being 2,595 against 2,636. In the Mysore District as many as 23 shops were closed, while in Tumkur, Kolar and Hassan the reduction was 8, 4 and 3 respectively. Bangalore and Chitaldrug closed two shops each and Shimoga had one shop opened. Nevertheless no practical inconvenience was brought to notice. The existing shops average one shop for 2,100 persons and for 11·3 square miles.

41. *Rentals.*—The rentals fetched from the sale of date toddy shops amounted to Rs. 13,47,939-6-11 against Rs. 13,83,610-6-4 in the previous year, showing a decrease of Rs. 35,670-11-5. This is no doubt due to the reaction of the increased rentals of 1909-10. It may be pointed out that sales take place in the months of April and May of each year when people, who naturally judging the prospects of the coming season in the light of their past experience, find themselves disappointed, become too slow to yield to the promises of a change for the better. The decrease is noticeable in all the districts except Mysore, Kolar and Chitaldrug. Mysore shows the highest increase and Kolar stands next. These two districts had the advantage of a two-year lease in some of their taluks. The increase in the Chitaldrug District is too small to call for remarks.

42. *Number of trees tapped.*—The number of trees tapped for local consumption was 396,882 date, 4,052 cocoanut against 435,618 date and 3,918 cocoanut of the previous year in the State itself, while 15,671 date, 1,331 cocoanut, and 100 palmyra trees were tapped in the British territory against 19,228 date, 500 cocoanut and 80 palmyra trees of the past year. The decrease is noticeable in all the districts to the extent of 41,372 trees under all heads. This may be attributed to the resuscitation of the date trees owing to good rains and the consequent increase in the yield. It would be interesting to compare the fluctuations in the rentals and in the number of trees licensed in the Mysore State to find out the relative effect of each on the other. The marginally noted figures show that Tumkur has kept its ground as regards trees notwithstanding its greatest loss in rentals, while Chitaldrug added a few rupees under rentals but has far receded in the matter of trees. It is only Kolar that shows a most satisfactory result under both heads. What is gained under rentals in Mysore is lost in trees, while the remaining districts show a decrease under both items.

District	Fluctuation	
	Rentals	Trees tapped
Bangalore	−14,826	−10,564
Kolar	+3,605	+752
Tumkur	−32,792	−217
Mysore	+14,475	−10,346
Hassan	−3,356	−3,436
Kadur	−3,030	−2,319
Shimoga	−59	−1,045
Chitaldrug	+456	−11,561

43. *Government and private trees.*—The total number of trees tapped in Mysore both for local and British shops amounted to 428,735, of which 265,944 were Government trees standing on unoccupied lands and the rest on occupied lands. The licensees of the Mysore State tapped during the year under report as many as 153,381 trees in private lands, and the remaining were taken up by the British renters. The following table explains the figures more clearly :—

	Government	Private	Total
For Mysore shops	2,63,171	1,53,381	4,16,552
For British shops	2,773	9,410	12,183
Total ...	2,65,944	1,62,791	4,28,735

The amount of tree-rent credited to Excise proper was Rs. 64,970-11-7 against Rs. 69,207-11-7 in 1909-10. Further details about tree-rent are given in Appendix F-1.

44. The percentage of Government, Private and British to the total number of trees stands as follows :—

	1910-11	1909-10
Government	61·4	61·2
Private	55·7	34·7
British	2·9	4·1

The low percentage of trees tapped for British shops may be due to the enhancement of tree-tax in Madras during the year under report. The percentage of private trees has gone up during the year and this indicates that trees in occupied lands are becoming more popular on account of their larger yield standing in cultivated fields and tree-owners should, therefore, have no cause for complaint.

45. Appendix G-1.—The percentage of tree-tax to the total toddy revenue fell again from 30·5 to 29 3, while that of the rental rose from 69·5 to 70·7. During the year under report the system of leasing out shops for two years was introduced and this must have affected the rentals to some extent. The fact that the percentage of tree-tax in this State has not gone above 33·6 is a clear indication that the rate of tax prescribed is capable of further enhancement. As, however, this measure has been adopted in the current official year, the result remains to be watched.

46. *Trees tapped for the Madras Presidency.*—The number of trees tapped in Mysore for the shops of the Madras Presidency amounted to 11,738 date and 445 cocoanut as against 16,127 date and 920 cocoanut in the previous year, while the Mysore licensees have taken up 15,671 date, 1,331 cocoanut and 100 palmyra trees as against 19,228 date, 500 cocoanut and 80 palmyra trees in the previous year. The intertapping of trees on either side of the frontier depends more on the inclinations of concerned licensees than to any external causes.

47. *Date plantation.*—The Deputy Commissioner, Mysore District, reports that the date plantation opened last year near Nagamangala is coming up well and that the seedlings and the saplings are healthy and that the plantation is full of hopes. During the year under review a plot of land measuring 29 acres in Settihalli village near Kikkeri in the Krishnarajpete Taluk was acquired for the Department and given out to an enterprising shanbhog to make it a good date plantation on condition that he should fence the whole plot, plough it and dibble new seeds and pay hulbanni and amarayi in return for the concession of cutting and removing the grass growing on the plantation. The date plants in the sand dunes of Talkad in the T.-Narsipur Taluk are reported to be a failure. As paucity of date trees is felt in the Nagamangala and Malvalli Taluks, every endeavour will be made to open out new plantations in these two taluks.

48. In the Kolar District, however, the planting operations near Vatathahosahalli in the Goribidnur Taluk are reported to be promising. The Lakkenahalli plantation in the Sidlaghatta Taluk is reported to be in good condition. The Deputy Commissioner desires to open out plantations in the Taluks of Mulbagal, Bagepalli

and Sidlaghatta. These will be taken up as lands congenial for date growth become available. The date groves in the village of Kellengere in the Arsikere Taluk and Devaramuddanhalli in the Hole-Narsipur Taluk of the Hassan District are recommended for extension by the Deputy Commissioner. The result of the experimental plantation in the Pavagada Taluk of the Tumkur District remains to be watched.

49. To open out plantations in the Shikarpur and Sorab Taluks two American ploughs were supplied to the Shimoga District. The effect of opening out the soil with these ploughs and consequently on the growth of the date palm is yet to be seen. Want of date groves is keenly felt in these two taluks and the proposal of getting trees from the Bombay frontier remains yet to be developed. In the meanwhile attention will be directed to open out local sources of supply.

50. *Inamdars' claims to toddy revenue.*—The number of alienated villages in the Province is 2,044, of which only 146 have current working toddy shops. The claims of 63 villages have been settled, while those of 30 are reported to be under investigation. During the year under review 8 cases were decided by Government and there are 31 cases pending for orders. Every effort is made to push on the work of investigation as expeditiously as possible.

51. The amounts of refund sanctioned during the year in respect of 37 villages aggregate to Rs. 46,640-14-1. The district of Mysore deserves special mention in having submitted the largest number of bills during the year. Many bills are lying over pending instructions from Government on the working of Rule 13 of the Inamdars' Rules.

Bagani Toddy.

52. *Number of shops.*—The number of Bagani toddy shops was reduced by 21 during the year, the actual number licensed being 698 against 719. Shimoga and Kadur closed 10 and 12 shops, respectively, while Hassan had one shop opened. There is great scope for further reduction in these shops and the subject will engage attention in due course.

53. *Rentals.*—The rentals of Bagani toddy shops amounted to Rs. 39,560-8-0 against Rs. 35,037-6 0 in the previous year, showing an increase of Rs. 4,523-2-0. All the three districts contributed to this result. While Hassan added Rs. 486-6-0 the contribution of Kadur and Shimoga was Rs. 3,675 and Rs. 361-12-0 respectively. In spite of the reduction in the number of shops, the result appears to be satisfactory.

54. *Number of trees tapped.*—The marginally noted figures compare the fluctuations in rentals and in the number of trees licensed. In spite of the facilities created for speedy marking of these trees, there has been a fall of 468 trees, actual number licensed being 15,618 against 16,086 in the previous year. Converting the fluctuation in trees into money value, it is found that Hassan has added Rs. 546 by way of tree-tax to the rental, while Shimoga has taken away Rs. 842 and has left a deficit of Rs. 480-4-0 above the rental. After deducting the loss under tree-tax, Kadur has still left a sum of Rs. 3,035 as an addition to the Bagani revenue. The affairs in the Shimoga District require to be looked into as no explanation is assigned for this fall. In the Hassan District the simplified rules for marking are reported to have tended to increase the number of trees. It is believed that the better working of these rules in the other two districts will produce better effect during the next official year when the renters will have become sufficiently acquainted with them.

District	Fluctuations. Rentals	Number of trees
Hassan	+ 489 6 0	+273
Kadur	+3,675 0 0	—320
Shimoga	+ 361 12 0	—421

CHAPTER V.—Country Malt Liquors.

(1) Beer.

55. *Number of taverns.*—With a view to place the sale of the draught English beer on the same footing as that of the country beer, it was contemplated to auction both the taverns at the same time; but owing to the agreement of the former licensees with their suppliers in England running till the 1st January 1911, the sale of the latter was given effect to from 1st August 1910 and that of the former from 1st

of January following. The country beer tavern at Robertsonpet was sold on an upset price of Rs. 250, while that at Bowringpet was closed. The duty of 2 annas and one and a half pies per gallon was levied on both country and English beers but in the case of the latter only in lieu of the surcharge fees which were being collected before.

56. During the year under report Bangalore Brewery beer was permitted to be sold at the Cubbon Park Fete in December last and also in the Military Canteen as usual on the tenant system. The licensees of the foreign liquor shops were also allowed only to sell bottled beer.

57. *Consumption.*—The consumption of beer throughout the State has risen from 4,953 gallons to 15,959 gallons in the year under review. The increase which appears to call for further enhancement of duty, may probably be due to this liquor getting into popular favour on account of its cheapness. This subject will be considered later on.

(2) Akkibhoja.

58. *Number of shops.*—During the year under report the 35 shops of the Tirthahalli Taluk in the Shimoga District were sold, while all the shops of the Kadur District were closed. The number of shops was, therefore, 35 against 43 in the previous year.

59. *Revenue.*—The shops of the Shimoga District fetched a rental of Rs. 2,052 against Rs. 2,002-8-0, showing an increase of Rs. 49-8-0. The increased rentals under Bagani toddy in the Kadur District may be attributed to the closing of all the Akkibhoja shops in that district.

60. While the Deputy Commissioner, Kadur, pronounces this beverage as a noxious and unwholesome drink, the Deputy Commissioner, Shimoga, states that, as it is easily manufactured and is more intoxicating than toddy or arrack, it is necessary that its manufacture should be regulated in such a manner that while placing no restrictions on its brew for *bona fide* domestic consumption, it is not permitted to affect the Excise revenue by competing with other drinks. The subject will, however, receive attention after a thorough investigation.

CHAPTER VI.—Intoxicating Drugs and Opium.

(1) Ganja.

61. *Supply of ganja.*—The stock imported from the British Store-house during the latter part of the previous year supplemented by the crop raised in the State was continued to be supplied throughout the year. The stock of ganja in the Provincial Stores on the 1st July 1910 was 8,229 seers and one tola and a quantity of 1,720 seers and 64 tolas was added to it in January following. As the Government of India sanctioned the import of the drug, duty free, from any of their Storehouses in the Madras Presidency or in the Central Provinces, it was thought best to employ a contractor for purchasing and supplying the State, and for this purpose tenders were called for. As, however, the rate tendered was abnormally high, arrangements were made to import the drug through the Government agency. Accordingly a quantity of 11,988 seers and 75 tolas was imported from the Santavasal Storehouse in the Madras Presidency at a cost of Rs. 12,000 for supplying the licensees during the following official year.

62. *Cultivation of ganja by Amani.*—The experimental cultivation undertaken during the year at Dodkurugod and round about Goribidnur was not as successful as it was expected to be. On account of the heavy rains during the year under report the plants became water-clogged and an outturn of 1,720 seers and 64 tolas only was obtained. The raiyats have, however, gained some experience in the raising of this crop and this will, no doubt, help them in future cultivations.

63. Only Khandwa seeds were used to grow the drug during the year under report. Seeing the preference of the consumers for the Daggupad stuff, it is thought expedient to make another experiment with seeds obtained from Daggupad and for this purpose arrangements are being made. It is hoped that better results will come out from the experience of the past failures.

64. *Price of ganja.*—The price of ganja was raised from Re 1 to Rs. 1-4-0 for a seer of 80 tolas during the year under report. With effect from 1st July 1911 the duty on a seer of ganja was raised from Rs. 5 to Rs. 7-8-0 per seer and the retail fixed selling price was consequently converted into a minimum price during the year under report.

65. *Shops.*—The number of ganja shops licensed during the year was 242 against 236 in the previous year. The increase is due to the opening of four additional shops in the Kolar District and one in each of the districts of Tumkur and Chitaldrug. The incidence was, therefore, one shop for 121·6 square miles and for 22,520 persons against 124·1 square miles and 22,995 persons in the previous year.

66. *Rental.*—The rental realised from the sale of ganja shops amounted to Rs. 26,739-4-0 against Rs. 23,648-12-0, thus resulting in an increase of Rs. 3,155-8-0. Tumkur and Hassan are the only districts which show a fall. The Deputy Commissioner of the latter explains it to be due to the stoppage of the sale of the drug in weekly markets and no explanation is offered for the former. The increase in the other districts is said to be due to keen competition at the sales.

67. *Consumption.*—The quantity of ganja retailed during the year amounted to 9,345 seers and 38½ tolas against 10,559 seers and 40 tolas in the previous year. The decrease is probably due to the not very superior quality of the stuff supplied and the fancy taken by consumers to the Daggupad stuff available in the bordering British shops. Necessary arrangements are being made for the supply of good ganja.

(2) Majum.

68. *Majum.*—As usual, this preparation of ganja was sold to the licensees of ganja shops from the Bonded Depots after levying a duty of Rs. 1-1-0 and a price of Re. 0-6-6 for a seer of 80 tolas. In consequence of the enhancement of the duty on ganja with effect from 1st July 1911, the duty on this drug also was enhanced to Rs. 1-8-0 per seer. The demand for this drug is limited to the Districts of Bangalore, Kolar and Shimoga.

69. *Consumption.*—The quantity of majum sold during the year was 339 seers and 24 tolas against 436 seers and 40 tolas. The decrease is distributed over all the three districts and is probably due to the diminished fancy of the consumers of this special preparation.

(3) Cocaine and Novocaine.

70. In the Bangalore City five licenses were, as usual, granted to Chemists and Druggists for the possession of cocaine and one to the Chief Medical Officer, Kolar Gold Fields.

71. Permits for the import of cocaine for use in the several hospitals in the State were granted to the Inspector of Cattle Diseases and to the Senior Surgeon.

(4) Opium.

72. *Supply.*—The opium required for consumption continued to be obtained from the Madras Store-house through the Residency.

73. *Price.*—There was no change in the price at which opium was supplied to the licensees, nor was there any in the purchase price. The former was, as usual, Rs. 37-8-0 a seer and the latter Rs. 11-9-0 as in the past year.

74. *Number of shops.*—The 109 shops of the past year were reduced to 108 due to the closure of one shop in the Mysore District found to be superfluous. The incidence was one shop for 272·4 square miles and for 50,461 persons.

75. *Rental.*—The rental realized by the sale of opium shops was Rs. 8,937-12-0 against Rs. 8,572 in the previous year, showing an increase of Rs. 365-4-0. The increase is made up of a fall in the Tumkur, Mysore and Chitaldrug Districts and a rise in the remaining districts. The net increase is attributed to keen competition during the sales.

76. *Consumption.*—The increase in the consumption of opium is too small to call for remarks, the actual quantity consumed being 1,246 seers and $20\frac{1}{16}$ tolas against 1,226 seers and $30\frac{3}{8}$ tolas in the previous year. The effect of the abolition of the fixed retail price in the current year on consumption remains to be watched.

77. *License to medical practitioners.*—As usual, five licenses were granted to medical practitioners for possession of morphia and opium and its preparations.

78. *Gain.*—The decrease under gain on sale proceeds of opium is due to increased transporting charges, the actual amount realized being Rs. 27,200-10-1 against Rs. 31,571-13-0 in the previous year, according to the Comptroller's figures.

CHAPTER VII.—Measures for the Protection of the Revenue.

79. *General results.*—During the year 1910-11, 2,301 cases affecting 2,662 persons were reported against 1,967 cases affecting 2,431 persons in the previous year, and including those pending from the previous year, the total number of cases which came before the officers of the department amounted to 2,624 affecting 3,087 persons as against 2,257 affecting 2,850 persons in the previous year. Appendix M gives a classified statement of the offences reported during the year, according to which 427 cases fell under heinous offences, 1,839 under breaches of license conditions and 35 under cutting of date trees and leaves against 495, 1,403 and 63, respectively, during the preceding year. There has again been a perceptible fall under the last head, while under the second the rise is considerable. The reason for the former is ascribed to the favourable rains during the year and the consequent abundance of fodder for cattle. The recent orders of Government investing the District Excise Officers with power to compound offences under Section 59 of the Forest Regulation to enable them to deal with offences of this class departmentally, will, it is hoped, tend to act as a powerful check against all danger to date trees by readily and promptly bringing the offenders to book and thus conduce to the better preservation of the groves. The large increase in the number of minor offences is due to cases of dead date trees having been brought under breaches of license conditions and to better inspection of groves and shops The increase is made up of a rise in the Bangalore, Mysore, Hassan and Chitaldrug districts and a fall in the remaining four districts. Of the cases under Excise Regulation and the rules affecting liquors, two cases related to smuggling, 65 to illicit distillation and possession of materials therefor, 139 to illicit tapping and 143 to unlicensed sales, illicit transport, possession without license, dilution and use of false measures. Sixteen cases of smuggling of intoxicating drugs and 31 of illegal cultivation of ganja hemp plants were also among the cases reported during the year. The case of illegal cultivation of poppy plants reported from the Sidlaghatta Taluk of the Kolar District was prosecuted to conviction. The increase in the number of cases of illicit distillation discovered was due to the temporary formation of a separate detective staff in Harihar and Shimoga by the deputation of men from the other districts. This arrangement could not, however, be continued without prejudice to the work in those districts.

80. *Bangalore District.*—The number of minor offences has increased by 48·3 per cent. There has also been a rise in the number of cases under illicit tapping and smuggling of ganja from 2 and 6 to 10 and 10, respectively probably due to the exertions of the special staff detailed exclusively for this purpose.

81. *Kolar District.*—There has been a fall in this district in the number of offences reported under breaches of license conditions by 30 per cent, while the number under heinous offences has slightly increased. The recent orders of Government sanctioning the retention of the patrol party on the Gold Fields for a further period of three years will, it is hoped, bring about better results.

82. *Tumkur District.*—It is satisfactory to note that in spite of the decrease under all heads of crime this district has maintained its place as regards the consumption of arrack and in the number of trees licensed. This is indicative of the policy of prevention taking ahead of detection.

83. *Mysore District.* The fall in the number of trees licensed in this district shows that there is more scope for improvement. The number of heinous offences

has slightly decreased. Surrounded on all sides by the British frontier, the smuggling of excisable goods from and into the State in this district has to be particularly guarded against and proposals are being submitted for the formation of detective parties. The number of cases of possession of intoxicating drugs without license has increased from 2 to 10 in the year under report.

84. *Hassan District.*—In spite of the fall in consumption, the number of cases under breaches of license conditions has risen. Of the heinous offences, those relating to illegal cultivation of hemp plant and to illicit tapping have fallen from 21 and 23 to 8 and 18, respectively, in the year under report. The fall in the number of illicit tapping cases is attributed to the vigilant supervision of the subordinates in the malnad part of the district and this must have tended to increase the number of Bagani trees during the year. The Deputy Commissioner is of opinion that the result would have been more satisfactory if a small preventive establishment had been added to the general staff.

85. *Kadur District.*—The noticeable feature in this district is the detection of 5 cases of illicit distillation in the Tarikere Range and a fall in the number of minor offences by 29·5 per cent. The Deputy Commissioner remarks that a large number of cases of illicit tapping goes undetected and unnoticed on account of the difficulties of detection and the inadequacy of the present establishment.

86. *Shimoga District.*—There is a marked improvement in the detection of cases of illicit distillation and possession of materials therefor in this district during the year under report. Most of these were successfully prosecuted to conviction. The constitution of Honnali into a separate Range, now under contemplation will, it is hoped, be productive of more satisfactory result in putting down illicit distillation said to be prevalent in the Lambani thandas thereabouts. The number of cases of illicit tapping detected during the year has, however, fallen and this may account for the fall in the number of bagani trees licensed.

87. *Chitaldrug District.*—The number of minor offences has enormously increased in this district owing to cases of dead date trees having been brought under breaches of license conditions as already observed. Under heinous offences there has been a general fall except that 10 cases of illicit distillation and possession of materials therefor are reported during the year against none in the previous year. The Deputy Commissioner again urges the necessity for the formation of a detective staff.

88. *Date leaf cutting.*—The number of offences relating to the cutting of date leaves and trees has again fallen from 63 in the previous year to 36 in the year under report. The Districts of Bangalore, Kolar and Kadur reported no cases under this head, while Tumkur, Hassan and Chitaldrug showed a decrease. The fall in the Tumkur District is noticeable as it reported only 5 against 24 in the previous year. The reason for the fall in these cases may be attributed to the copious rainfall in the year under report.

89. *Departmental disposal.*—Appendix M 1 shows the disposal of cases by the officers of the department. It is satisfactory to note that the percentage of disposal rose from 85·9 to 86·5 in the year under report. Bangalore had the heaviest file and Kolar the lightest and the percentage of disposal in these districts was 89·9 and 89·0 respectively.

90. *Disposal by the Magistracy.*—The number of cases sent up for trial before the Magistrates was 348. Including the cases pending with them from the previous year, the total number of cases they had to deal was 398. All but 45 were disposed of before the close of the year. Out of 604 persons concerned, 457 were convicted, 67 acquitted and 9 were disposed of otherwise, leaving 71 awaiting their trial. The percentage of conviction was, therefore, 75·6.

91. *Opium cases.*—No cases of opium smuggling were reported during the year.

92. *Rewards.*—The rewards sanctioned during the year amounted to Rs. 596 and a further sum of rupees 151-13-3 was spent on secret service, aggregating to a total expenditure of Rs. 747-13-3.

93. *Assault on officers.*—No cases of assault on officers were reported during the year.

94. *Detective staff.*—As incidentally observed above, the Deputy Commissioners urge for the employment of special detective parties and the Government have also recognized the necessity for the same. Proposals are, therefore, being worked out and submitted.

95. *Inspection.*—Appendix O shows the details of inspection and itineration made by the District Excise Officers. It will be observed therefrom that the District Excise Officer, Bangalore, has inspected the largest number of shops, although he was on tour only during 129 days in the year. The District Excise Officer, Kolar, who spent 228 days on tour has not inspected half as much as the former.

96. Mr. Sparkes who continued to be in charge of the Department till the 22nd April 1911 toured in all the districts and inspected the registers of 20 Range Offices, 29 Taluk Offices, 11 Sub-Range Offices and 25 Bonded Depots with those of the District Excise Offices of Tumkur and Shimoga. The notes of inspection were duly communicated to the officers concerned. He visited the Distillery 12 times and inspected the shops in the Bangalore and the Mysore Cities and casually in other places. After I assumed charge, I inspected the registers of the Mysore Taluk with the Bonded Depot registers and found there was decided improvement since Mr. Sparkes' last inspection. I also visited the Distillery thrice and the notes of inspection were communicated to all concerned.

CHAPTER VIII.—Financial Results.

97. *Demand, collection and balance of Excise revenue.*—The gross demand for the year amounted to Rs. 45,43,180-0-11 against Rs. 47,20,040-4-9 and the gross collections to Rs. 43,73,579-11-6 against Rs. 46,24,442-9-1 in the previous year, the percentage of collection being 96·3 against 95·6. Appendices F and F-1 give the figures for each district and Appendix K gives the collection under each head of revenue. The loss in gross demand is partly due to the recovery of arrears as will be seen from the marginally noted figures representing the arrears outstanding at the close of each year and partly to the decrease in the current year's revenue.

	Rs.	a.	p.
1900-01 ...	2,80,972	7	0
1901-02 ...	2,40,443	15	4
1902-03 ...	2,60,683	1	7
1903-04 ...	2,61,033	13	5
1904-05 ...	2,50,379	0	11
1905-06 ...	2,33,681	10	1
1906-07 ...	2,73,481	7	1
1907-08 ...	2,45,526	8	9
1908-09 ...	2,19,357	14	2
1909-10 ...	1,86,432	6	3
1910-11 ...	1,68,297	12	11

98. *Arrears.*—The total arrears demand, including tree rent at the beginning of the year, was Rs. 1,87,756-10-7, of which Rs. 26,330-11-8 were collected and Rs. 4,514-11-10 were remitted, leaving a balance of Rs. 1,56,911-3-1 at the close of the year. The percentage of this collection was highest in the Tumkur District where it amounted to 36·8 and lowest in Mysore, being only ·02.

99. *Current demand.*—The total current demand for the year amounted to Rs. 43,55,423-6-4 against Rs. 44,99,278-13-1, showing a decrease of Rs. 1,43,855-7-7 or 3·3 per cent chiefly under duty, rentals and tree-tax. The demand under the several heads (omitting fractions of a rupee) is given below :—

Major heads	Minor heads	1909-10	1910-11
		Rs.	Rs.
Arrack ...	Still-head duty	18,52,860	18,27,104
	Shop-rental	3,64,132	3,34,508
Country beer ...	Duty	670	3,159
	License fees	1,939	5,021
Akkibhoja ...	License fees	3,983	2,052
Foreign liquor ...	License fees	14,352	13,343
Toddy Date ...	Shop-rental	13,83,610	13,47,940
	Tree-tax	5,91,704	5,42,006
Bagani ...	Shop-rental	35,037	39,561
	Tree-tax	32,631	31,738
Tree-rent ...	Tree-rent	77,313	70,641
Gangja and majum ...	Duty and price	63,998	58,861
	License fees	23,649	26,739

Major heads	Minor heads	1909-10	1910-11
		Rs.	Rs.
Opium	License fees	8,579	8,957
	Gain on sale proceeds ...	31,572	27,201
Miscellaneous	.....	9,451	12,818
Proportionate share of the cost of the Central Distillery establishment charges recovered from the Civil and Military Station, Bangalore ...	.....	3,796	3,796
	Total ...	44,99,277	43,55,425

100. *Causes for variation on several heads.*—The decrease under arrack duty and tree-tax is due to the diminished consumption of arrack and a fall in the number of trees licensed. The decrease under rentals has already been explained under the corresponding heads. The decrease under gain on sale proceeds of opium may probably be due to increased transporting charges. The increase under miscellaneous is due to the recovery of Rs. 2,073-13-8 from the arrack carrying contractors for excess wastage. The other items do not call for further remarks than what has already been stated under their respective heads.

101. *Proportion of fixed to variable portion of the revenue under country spirits and toddy.*—84·9 per cent of the revenue from country spirits was derived from Excise duty and 15·1 per cent from rental against 83·5 per cent under the former and 16·5 under the latter in 1909-10, while the proportion of toddy rentals and tree-tax to the total toddy revenue was 70·7 and 29·3 against 69·5 and 30·5, respectively, in the previous year. 41·8 per cent of the total Excise revenue for the year was derived from the sale of the various privileges, while it was 40·7 per cent in the last year.

102. *Collections.*—The total collections under current demand amounted to Rs. 43,42,734-4-0 against Rs. 44,78,785-15-0 in the previous year. The balance outstanding at the end of the year was Rs. 12,689-2-4 against Rs. 16,697-1-6 at the end of the previous year. The percentage of collection for the whole State was 99·8 against 99·7. Thus there has been some improvement in this direction in the year under report. The districtwar percentage of collection is noted below :—

Mysore	99·9
Hassan	
Shimoga	
Chitaldrug	99·8
Tumkur	99·7
Bangalore	99·6
Kadur	
Kolar	99·4

The collection work was, as usual, satisfactory.

103. The marginally noted 28 taluks arranged districtwar show nil balance in respect of the current demand, of which, Pavagada, Nagar and Molakalmuru show the same in respect of the gross demand also. The taluks of Mysore, Bowringpet and Bangalore have Rs. 18,116-3-9, Rs. 17,690-1-7 and Rs. 11,134-3-10, respectively, outstanding against them and it is hoped that the Deputy Commissioners will see to their early adjustment.

Bangalore District—
1. Dodballapur.
2. Channapatna.

Kolar District—
1. Malur.

TumkurDistrict—
1. Gubbi.
2. Tiptur.
3. Pavagada.

Mysore District—
All the taluks except Krishnarajpete.

Hassan District—
1. Hassan.

Shimoga District—
1. Sorab.
2. Honnali.
3. Sagar.
4. Nagar.

Chitaldrug District—
1. Chitaldrug.
2. Holalkere.
3. Jagalur.
4. Molakalmuru.

104. *Net receipts.*—Excluding out of the gross collections, the Local cess on certain items to the extent of Rs. 2,27,260-1-8 credited to Local Funds and a further sum of Rs. 5,672-11-0 credited to other Departments on account of tree-rent on toddy trees standing in the lands under their management, the net revenue credited to Excise amounted to Rs. 41,40,646-14-10 against Rs. 43,06,230-9-4 in 1909-10.

105. *Expenditure.*—The total expenditure under all heads amounted to Rs. 3,36,297-0-10 against Rs. 3,20,754-0-5. The increase was principally under remuneration to arrack carrying contractors and under salaries of District Excise Officers. The total cost of the establishment, including officers of the Excise Department, calculated on the total gross receipts, was 5·9 against 5·7 per cent, while the percentage of the total expenditure under all charges amounted to 7·6 against 7·0 per cent of the previous year.

106. *General incidence of taxation.*—The incidence per head of population on the total Excise gross receipts was Rs. 0-13-2·4 against Rs. 0-13-2·6 in the previous year.

107. Some of the Deputy Commissioners are again urging the necessity of strengthening their office establishment. But as per orders of Government, proposals are called for on the subject of revising the same without additional cost.

108. *Departmental training.*—The Excise Training School, which was continued, ran through two sessions during the year. There was no change in the subjects taught. The following table gives the results achieved in the school in each session :—

Session	Number in class	Number passed including failures of the previous session		
		Alcoho-lometry	Excise Law	Criminal Law
1st session from 1st August 1910 to 6th November 1910 ...	20	16	17	13
2nd session from 7th November 1910 to 13th February 1911	33	29	31	24

The effect of training has no doubt improved the Department considerably. Mr. Shamanna, Assistant Commissioner, was in charge of the class as in last year, and instructions were given by Inspector N. Ranga Rao Naidu, B.A.

109. The officers of the Department have, on the whole, acquitted themselves well in the discharge of their duties.

The office establishment is quite up to the mark and continues to show the good work commented upon by Mr. Sparkes in the last report.

I have the honor to be,
Sir,
Your most obedient servant,
K. DORASWAMI IYER,
Offg. Excise Commissioner in Mysore.

APPENDIX A.

Statement showing the details of the adjustment of the money advanced by Government for payment to the manufacturers of arrack for spirits sent to Bonded Depots during 1910-11.

Period	Amount to be adjusted			Deduct adjustments made			
	Opening balance of arrears unadjusted	Paid to manufacturers during the year	Total	Received from shop-keepers drawing arrack	Struck off the account on account of bung wastage incurred in Bonded Depots	Total	Balance remaining to be adjusted
	Rs. a. p.	Rs. a. p.	Rs. a. p.	Rs. a. p.	Rs. a. p.	Rs. a. p.	Rs. a. p.
On account of the current as well as the past contract	*16,784 8 7	3,27,728 9 10	3,44,513 2 5	3,33,021 12 5	.....	3,33,021 12 5	† 11,491 6 0

* Revised figures given by the Comptroller

† A sum of Rs. 2,073-13-8 was recovered from the arrack carrying contractors on account of duty and price for 381 gals., 39¾ drs. owing to excess bung wastage incurred in the several Bonded Depots for the years 1907-08 to 1909-10.

APPENDIX B.

Statement showing the quantity of arrack and other country spirits transported by arrack distributing contractors from the Government Central Distillery to Bonded Depots, and the remuneration paid to them for 1910-11.

Districts	Spirits transported				Remuneration				Deduct duty and price of bung wastage incurred in the depots		Balance payable to contractors		Remarks
